

# Faster....Higher!

**Publishing high quality research on all aspects of photochemistry and photobiology**  
***Photochemical & Photobiological Sciences* is the official journal of the European Photochemistry Association, the European Society for Photobiology, the Asia and Oceania Society for Photobiology and the Korean Society of Photoscience**

- Impact factor 2.416 – the highest of any journal in the field\*
- Rapid publication times
- High visibility – indexed in MEDLINE and ISI
- Enhanced HTML articles, including:
  - Hyperlinked compound information, including downloadable structures in text
  - Gene, Sequence and Cell Ontology terms linked to definitions and related articles
  - IUPAC Gold Book terms linked

# Physically demanding

*PCCP* is acknowledged as the journal of choice for fast publication of cutting-edge research in physical chemistry, chemical physics and biophysical chemistry. Committed to publishing research of the highest quality, at **0.866**, *PCCP* has the highest official ISI immediacy index of any general physical chemistry journal and an impressive impact factor of **2.892**.<sup>\*</sup> Our times to first publication in a citable form are impressively rapid and unparalleled by our closest competitors.

*PCCP* publishes its tenth volume in 2008. A challenging decade has seen the journal successfully establish its place on the physical chemistry leaderboard; a reflection of its speed of publication, enduring quality, broad scope, and high impact.

And at *PCCP* we're always raising the bar. Striving to beat our personal best. So things can only go from strength to strength. Make *PCCP* your first choice.

## Aiming higher
