

## There is an easier way to keep up with research in your field...

An integral part of managing your career as a scientist is staying on top of the news and developments in your field of research and related areas. A good knowledge of your industry is a key component to your success, but finding the time to keep up with the latest research news can pose the greatest challenge.

**The solution?** By signing up for e-alerts from one of our free news services, you can receive updates about newsworthy and significant research appearing in RSC journals in a quick and easily digestible monthly alert.

**Free access.** From each news item you can link directly to the source research paper, which is completely free to access and download for a limited period.

**Tools to help you.** In addition to research news, our news services also feature

- **Instant insights** – whirlwind tours of exciting research areas you should know about
- **Interviews** – leading scientists share their opinions

Join us on **twitter** to keep up-to-date with the latest developments from our news services. HighlightsTech, HighlightsBiol, HighlightsSci

# Where physics meets chemistry meets biology

**"There is no Matter like *Soft Matter*!"**

Martien Cohen Stuart,  
*Soft Matter* Editorial Board Chair

## Number one in the field

*Soft Matter* launched in 2005 with the aim of bringing together research communities across physics, chemistry, biology, materials science, and engineering - offering a platform where scientists can turn for interdisciplinary inspiration.

*Soft Matter* is the only journal that unifies the soft matter communities from all disciplines. With the top impact factor (4.869) and immediacy index (0.881) of any journal in the field,\* *Soft Matter* is number one for exciting and innovative research that crosses all borders. With a truly international readership and authorship, the journal attracts submissions from across the globe and – in a clear reflection of its success – moved from 12 to 24 issues a year in 2009.
