

'Dalton Transactions book of choice'

Why not take advantage of free book chapters from the RSC? Through our 'Dalton Transactions book of choice' scheme *Dalton Transactions* will regularly highlight a book from the RSC eBook Collection relevant to your research interests. Read the latest chapter today by visiting the *Dalton Transactions* website.

The RSC eBook Collection offers:

- Over 900 new and existing books
- Fully searchable
- Unlimited access

Why not take a look today? Go online to find out more!

Chem Soc Rev

Chemical Society Reviews

Volume 38 | Number 5 | May 2009 | Pages 1201–1508

Themed issue: Metal–organic frameworks

RSC Publishing

CRITICAL REVIEW
Guest editors: Jeffrey Long and Omar Yaghi
Secondary building units, nets and building in the chemistry of metal-organic frameworks

TUTORIAL REVIEW
Takashi Uemura, Nobuhiro Yanai and Susumu Kitagawa
Polymerization reactions in porous coordination polymers

ISSN 0300-0554
CODEN CSREV5
DOI: 10.1039/B800000A

Themed issue: Metal–organic frameworks

Metal–organic frameworks (MOFs) combine chemistry and geometry to produce technology-generating properties in a way that is rarely experienced in science. The vast expanse of possibilities that MOF chemistry offers has allowed many researchers from around the world to emerge as important leaders for their own unique contributions. This issue showcases some of these contributions, while presenting a diverse range of exciting recent developments in the field.

Reviews include:

Hydrogen storage in metal–organic frameworks

Leslie Murray, Mircea Dinca and Jeffrey Long

Recent advances on simulation and theory of hydrogen storage in metal–organic frameworks and covalent organic frameworks

Sang Soo Han, José L. Mendoza-Cortes and William A. Goddard III

Polymerization reactions in porous coordination polymers

Takashi Uemura, Nobuhiro Yanai and Susumu Kitagawa

Large breathing effects in three-dimensional porous hybrid matter : facts, analyses, rules and consequences

G rard F rey and Christian Serre

Industrial applications of metal–organic frameworks

Alexander U. Czaja, Natalia Trukhan and Ulrich M ller

Design and synthesis of metal–organic frameworks using metal–organic polyhedra as supermolecular building blocks

John J. Perry IV, Jason A. Perman and Michael J. Zaworotko

Guest editors

Jeffrey R. Long
University of California,
Berkeley, USA

Omar M. Yaghi
UCLA, USA

"The purpose of this themed issue is to... inform readers about a selection of topics in the field that are currently the subject of intense research."
