## A Chemical Approach to Nanomaterials

By Geoffrey A Ozin and André C Arsenault

- Interdisciplinary and comprehensive
- Presents a basic chemical strategy for making nanomaterials
- Describes some of the principles of materials self-assembly over 'all' scales
- Demonstrates nanometre and micrometre scale building blocks
- Suggests new ways to tackle research problems
- Includes speculations on how to think about assembling the future of nanotechnology

*Nanochemistry: A Chemical Approach to Nanomaterials* is well illustrated with graphical representations of the structure and form of nanomaterials. It contains many pedagogical features and will appeal to graduate and advanced undergraduate students.

Hardcover | 0 85404 664 X | 2005 | 594 pages | £39.95 | RSC member price £25.75
