The Analyst

A monthly international journal dealing with all branches of the theory and practice of analytical chemistry, including instrumentation and sensors, and physical, biochemical, clinical, pharmaceutical, biological, environmental, automatic and computer-based methods

Papers Presented at the
2nd International Conference on
Nuclear and Radiochemistry
Brighton, UK.
July 11–15 1988

Vol.114 No.3 March 1989

Information for Authors

Full details of how to submit material for publication in *The Analyst* are given in the Instructions to Authors in the January issue. Separate copies are available on request.

The Analyst publishes papers on all aspects of the theory and practice of analytical chemistry, fundamental and applied, inorganic and organic, including chemical, physical, biochemical, clinical, pharmaceutical, biological, automatic and computer-based methods. Papers on new approaches to existing methods, new techniques and instrumentation, detectors and sensors, and new areas of application with due attention to overcoming limitations and to underlying principles are all equally welcome. There is no page charge.

The following types of papers will be considered:

Full papers, describing original work.

Short papers: the criteria regarding originality are the same as for full papers, but short papers generally report less extensive investigations or are of limited breadth of subject matter

Communications, which must be on an urgent matter and be of obvious scientific importance. Rapidity of publication is enhanced if diagrams are omitted, but tables and formulae can be included. Communications receive priority and are usually published within 5-8 weeks of receipt. They are intended for brief descriptions of work that has progressed to a stage at which it is likely to be valuable to workers faced with similar problems. A fuller paper may be offered subsequently, if justified by later work.

Reviews, which must be a critical evaluation of the existing state of knowledge on a particular facet of analytical chemistry.

Every paper (except Communications) will be submitted to at least two referees, by whose advice the Editorial Board of *The Analyst* will be guided as to its acceptance or rejection. Papers that are accepted must not be published elsewhere except by permission. Submission of a manuscript will be regarded as an undertaking that the same material is not being considered for publication by another journal.

Regional Advisory Editors. For the benefit of potential contributors outside the United Kingdom, a Panel of Regional Advisory Editors exists. Requests for help or advice on any matter related to the preparation of papers and their submission for publication in *The Analyst* can be sent to the nearest member of the Panel. Currently serving Regional Advisory Editors are listed in each issue of *The Analyst*.

Manuscripts (three copies typed in double spacing) should be addressed to:

The Editor, *The Analyst*,
Royal Society of Chemistry,
Thomas Graham House,
Science Park,
Milton Road,
CAMBRIDGE CB4 4WF, UK

Particular attention should be paid to the use of standard methods of literature citation, including the journal abbreviations defined in Chemical Abstracts Service Source Index. Wherever possible, the nomenclature employed should follow IUPAC recommendations, and units and symbols should be those associated with SI.

All queries relating to the presentation and submission of papers, and any correspondence regarding accepted papers and proofs, should be directed to the Editor, *The Analyst* (address as above). Members of the Analytical Editorial Board (who may be contacted directly or via the Editorial Office) would welcome comments, suggestions and advice on general policy matters concerning *The Analyst*.

Fifty reprints of each published contribution are supplied free of charge, and further copies can be purchased.
