

INDEX OF SUBJECTS.

- Absolute configuration, 384.
 Absorptiometric methods in analysis, 363.
 Acepleiadylene, formation of, 193.
 Acetone, activation energy of decomposition of, 24.
 Acetyl groups, detmn. of, 357.
 17-Acetylandrostan-17-ols, rearrangement of, 225.
 Acetylenes, 171.
 Acids, carboxylic, crystal structure of, 405.
 fatty, 179.
 long-chain, crystal structure of, 405.
 Acorone, structure of, 207.
 Acridine, crystal structure of, 410.
 Acrylonitrile, γ -induced polymerisation of, 42.
 polymerisation of, by azoisobutyronitrile, 50.
 Actinomycin, depeptido-, structure of, 235.
 Actinomycins, structure of, 235.
 Adsorption, 60.
 thermodynamics of, 60.
 Agapanthagenin, structure of, 227.
 Aglycones, cardiac, 227.
 Ajmalidine, structure of, 245.
 Ajmaline, structure of, 245.
 Aldohexoses, reaction of, with sulphuric acid, 250.
 Aldonolactones, reduction of, 250.
 Aldopentoses, reaction of, with sulphuric acid, 250.
 Alicyclic compounds, 198.
 Aliphatic compounds, 171.
 Aliphatic S_E reactions, 140.
 Alkali metals, reduction by, 162.
 Alkaloids, 239.
 Alkoxides of vanadium-group elements, 115.
 Allene, dimerisation of, 198.
 Allenes, 171.
 Allyl acetate, catalysed bulk polymerisation of, 50.
 Alstoniline oxide, structure of, 245, 246.
 Alstyrene, synthesis of, 245.
 Aluminium, detmn. of, 336.
 test for, 339.
 unipositive, 90.
 Aluminium borohydride, dissociation of, 87.
 structure of, 88.
 phosphate, structure of, 390.
 "Ambident," definition of, 158.
 Amides, infrared spectra of, 13.
 Amides, structure of, 406.
 Amine oxides in organic reactions, 170.
 Amino-acids, oxidation of, by micro-organisms, 289.
 Aminoboranes, reactions of, 88.
p-Aminosalicylic acid, structure of, 406.
 11-Aminoundecanoic acid, hydrobromide, crystal structure of, 412.
 Ammonia, liquid, electrochemical properties of, 94.
 Ammonia synthesis, stoichiometric number for, 67.
 Ammonia-diborane, structure of, 389.
 Ammonium imidoperchlorate, formation of, 103.
 Amperometric titration, 361.
 "1- α -Amyradiene," 213.
 α -Amyrin, structure of, 212.
 Anacyclin, 172.
 (\pm)-Anagyrene, total synthesis of, 241.
 Analytical chemistry, 332.
 ion-exchangers in, 81.
 Anataze, crystal structure of, 392.
 Angustione, structure of, 216.
 Aniline, photo-excited, decomposition of, 26.
 Annotinine, structure of, 249.
 Anthracene, crystal structure of, 407.
 Antibiotics, 185.
 Anti-esterase action, mechanism of, 295.
 Antimony, concentration of traces of, 332.
 Antimony(III), detmn. of, 336.
 Antimony as reducing agent, 333.
 Antimony bromide, formation of Rb_3SbBr_5 and $Rb_3Sb_2Br_{11}$ from, 99.
 Ants, compounds isolated from, 204.
 Apurinic acids, 265.
 D-Arabinose, preparation of D-erythrose from, 251.
 Argon, heat of sorption of, in chabazite, 61.
 Aristolochic acid, structure of, 189.
 Arndt-Eistert homologation, 168.
 Aromatic compounds, 186.
 ring-cleavage of, biochemical, 280.
 Arsenic, detmn. of, 344.
 Arylsulphatases, 321.
 Ascorbic acid as titrimetric reagent, 349.
 Aspidin, structure of, 216.
 Atisine, diacetyl-, pyrolysis of, 248.
 Atoms, reactions involving, 31.
 Aurocyanic(I) acid, preparation of, 124.
 Azulene, crystal structure of, 408.
 Azulenes, 196.
 Barbaloin, structure of, 189.
 Barium, detmn. of, 350.
 test for, 341.

- Barium hydride chloride, 86.
 Barium sulphate, precipitation of, 343.
 Barringtonic acid, structure of, 213.
 Barringtonol, structure of, 213.
 Beckmann rearrangement, the, 154.
 Bellaradine, identity of, with cuscohygrine, 241.
 Benzene iodochloride, crystal structure of, 413.
 Benzeneseleninic acid, crystal structure of, 407.
 p-chloro-, crystal structure of, 407.
 Benzil \rightarrow benzilic acid change, 154.
 Benziminazole, reactions of, 234.
 Benzocyclobutene, formation of, 187.
 2 : 13-Benzofluoranthene, configuration of, 409.
 Benzoic acids, oxidation of, by micro-organisms, 287.
 Benzo[c]phenanthryl-5-acetic acid, 1 : 12-dimethyl-, optical resolution of, 188.
 3 : 4-Benzopyrene, structure of, 408.
 Benzo[a]pyrene-3 : 12-quinone, synthesis of, 190.
 Benzoxazolone, 6-methoxy-, occurrence and synthesis of, 234.
 Benzoyl groups, detmn. of, 357.
 Benzoyl peroxide, oxidation of phenols by, 148.
 Benzyne intermediates, 192.
 Berkelium-248 isotope, formation of, 118.
 Beryllium, detmn. of, 344, 350, 353.
 test for, 340.
 unipositive, 85.
 Beryllium boride, crystal structure of, 394.
 Beryllium oxyacetates, 85.
 Biological chemistry, 279.
 Biopterin, 235.
 Bis-(*NN*-dimethyldithiocarbamate)-nitrosylcobalt(II), 121.
 Bisdiphenylchromium(I) iodide, 111, 198.
 Bismuth, concentration of traces of, 332.
 detmn. of, 346.
 test for, 339.
 univalent, 90.
 Bixbyite, crystal structure of, 393.
 Borate, detmn. of, 337.
 Borides of lanthanides, 112.
 Borohydrides, preparation of, 87.
 Boron, detmn. of, 337.
 Boron hydrides, 86.
 Boron trichloride, addition compounds of, 88.
 trifluoride, addition compounds of, 88.
 trihalides, heats of solution of, 88.
 β -Boswellic acid, stereochemistry of ring A of, 213.
 Branching in polymerisation, 55.
 Bromine complexes, crystal structure of, 413.
 pentafluoride, structure of, 104.
 trifluoride, structure of, 103.
 Browning of foods, non-enzymic, 253.
 Butadiene-trifluoroacetonitrile reaction, 33.
*cyclo*Butanone, formation of, 198.
tert.-Butyl phenyl ketone, fission of, by chromic acid, 146.
n-Butyl radicals, decomposition of, 31.
 Butyrospermol, structure of, 212.
 Cadmium, detmn. of, 343, 350.
 test for, 340.
 Cadmium chloride, anhydrous, 125.
 Caesium oxides, structure of, 85.
 Cafestol, structure of, 208.
 "Calcium" as a substitute for murexide as indicator, 346.
 Calcium, detmn. of, 346.
 Calcium hydride chloride, 86.
 Calcium sulphate. *See* Gypsum.
 Carbanions, 140.
 "Carbenes," 147, 150.
 Carbon, detmn. of, 354.
 Carbon monoxide, adsorption of, on nickel films, 64.
 Carbon tetraiodide, reactions of, 91.
 Carbonyl compounds, 166.
 Carbonyls, reaction of, with isocyanides, 107.
 Carboxylic acids, 168.
 β -Carotene, 175.
 Carotenoids, 174.
 β -Caryophyllene chloride, crystal structure of, 415.
 Catalysis, 66.
 heterogeneous, 60.
 Catechol-violet, uses of, 346.
 Cerimetric titrations, indicators for, 345.
 Cerium(IV), test for, 341.
 Cerium(IV) iodate, crystal structure of, 391.
 sulphate, titration of, 353.
 "Charge transfer complexes," 231.
 Chemisorption, 62.
 Chitose, structure of, 252.
p-Chlorobenzene iododichloride, structure of, 104.
 Chlorocarbon, $C_{10}Cl_{12}$, structure of, 199.
 Chlorophenoxyacetic acid herbicides, oxidation of, by micro-organisms, 292.
 Chlorotungstates, complex, 117.
 Chloryl fluoride, preparation of, 103.
 Cholesta-1 : 3 : 5-trien-7-one, 219.
 Cholest-1-ene, pure, 218.
 Cholesterol, biosynthesis of, 307.
 catabolism of, 310.
 Cholesterol balance, 309.
 Chondrosulphatase, 325.
 Chromate, detmn. of, 337.
 Chromatography in analysis, 376.
 Chromium(II) salts, use of, in Kjeldahl procedure, 356.
 Chromium(III), detmn. of, 347.
 Chromone derivatives, sulphonation of, 238.
 Chrysene, structure of, 408.
 syntheses of, 188.
 Circumanthracene, configuration of, 409.
 Claisen rearrangement, the, 157.
 Cobalt, detmn. of, 336, 346.
 tests for, 340, 341.

- Cobalt(III), detmn. of, 354.
 Cobalt(III) as oxidising titrant, 349.
 Cobalt carbonyl hydride, position of hydrogen atom in, 106.
 Cobalt selenides and tellurides, 84.
 Codeine, crystal structure of, 414.
 Coefficients, activity, in ion-exchange resins, 72.
 selectivity, in ion-exchange resins, 72.
 Colorimetric reagents, 336.
 Columbin, structure of, 209.
 Complexes of transition elements, 105.
 Complexometric titrations, 350.
 indicators for, 346.
 Condensed ring systems, 233.
 Conductometric titration, 370.
 Co-ordination compounds, crystal structure of, 397.
 Copolymers, block, 55.
 graft, 55.
 Copolymerisation, 54.
 Copper, concentration of traces of, 332.
 detmn. of, 334.
 sexaco-ordinated, 123.
 Copper(II), reduction of, on resin, 354.
 test for, 340.
 Copper(II) acetate, Cu-Cu distance in, 123.
 " Cord factor," identity of, 180.
 " Corticosteroidogenesis," 311.
 Corynantheidine, configuration of, 243.
 Corynantheine, configuration of, 243.
 Coulometric titration, 369.
 Coumarones, 3-aroyle-, 237.
 Crinine, structure of, 247.
 Cross-linking, degree of, 72.
 Crucibles, porcelain, cooling of, 333.
 Crystallography, 383.
 Crystals, infrared spectra of, 16.
 Cumulenes, 171.
 isoCyanic acid, structure of, 389.
 Cyanogen chloride, structure of, 389.
 (-)-Cytisine, synthesis of, 240.

 Dammar resin, triterpenes from, 211.
 Dead-stop end-point titrations, 369.
 Decaborane, reactions of, 87.
 Dehydroangustione, structure of, 216.
 Dehydrogenation, 163.
 by halogenated quinones, 145.
 Dehydronorcamphor, preparation of, 204.
 Delpheline, structure of, 249.
 Delphinine, structure of, 249.
 Deoxyribonucleic acid, 264.
 Depolymerisation, 59.
 " Desmosterol," structure of, 227.
 Deuterides, crystal structure of, 393.
 Deuterium-hydrogen exchange reaction, 32.
 Dianin's compound, inclusion products of, 236.
 structure of, 236.
 Dibasic acids, ratio of dissociation constants of, 136.
 Dibenzenechromium(0), 110, 197.
 Dibenzene-molybdenum(0), 110, 198.

 1 : 2 : 3 : 4-Dibenzocyclooctatetraene, 5 : 8-diphenyl-, preparation of, 187.
 Dibenzyl hydrogen phosphate, crystal structure of, 407.
 Diborane-ammonia, structure of, 359.
 Diboron tetrachloride, structure of, 389.
 2 : 4-Dichloro-3-phenylcyclobutenone, racemisation of, 198.
 Diethyl ether-nitrogen dioxide reaction, 33.
 NN'-Dicyclohexylcarbodi-imide, use of, 171.
 Di(hydroxyduryl)methane, crystal structure of, 413.
 Dihydrohydroxyeremophilone, structure of, 205.
 Dihydroxy-fumaric and -maleic acid, nature of, 405.
 3 : 11-Dihydroxytestan-1-one as normal constituent of urine, 306.
 Dimethylacetylene, crystal structure of, 412.
 NN'-Dimethylaniline, use of, as promoter, 50.
 1 : 2-Dimethylenecyclobutane, formation of, 198.
 Dimethylketen dimer, crystal structure of, 412.
 Dimethylphosphinoborine, structure of, 389.
 NN'-Dimethylsulphamidedisulphonic anhydride, ammonolysis of, 101.
 Dinitrogen pentoxide-nitric oxide reaction, 33.
 Dinitrogen tetroxide, properties of, 94.
 Dinitrosyl pyrosulphate, 95.
 Dioscorine, tentative structure of, 240.
 Diphenyl ether, crystal structure of, 412.
 Diphenyloctatetraene, structure of, 409.
 Diplopartyrines, α - and β - structure of, 241.
 Dipole moments of meso-ionic tetrazoles, 230.
 2 : 2'-Dipyridyl, crystal structure of, 410.
 Dioxan, complexes, crystal structure of, 413.
 Disiloxane, structure of, 93.
 Disulphur dinitride, 101.
 Diterpenes, 208.
 1 : 4-Dithian, structure of, 411.
 1 : 4-Dithiins, 232.
 Di-*p*-tolyl sulphide, etc., crystal structure of, 412.
 Divicine, structure of, 232.
 Donnan equilibrium in ion-exchange equilibria, 71.
 Dosimetry in radiation chemistry, 35.
 Double bond in steroids, location of, 217.
 Dumortierigenin, structure of, 213.

 Elaiomycin, structure of, 182.
 β -Elemene, structure of, 205.
 Enzymes, inhibited, degradation of, 301.
 Eperuic acid, structure of, 208.
 Eremophilone, hydroxydihydro-, crystal structure of, 415.

- Erysotrine, dihydro-, degradation of, 246.
 Erythraline, structure of, 247.
 Erythromycin, structure of, 185.
 D-Erythrose, preparation of, 251.
 Ester sulphates, biosynthesis of, 329.
 Esters of sugars, 254.
 Esterases, 294.
 Ethyl radicals, decomposition of, 28, 29.
 Ethylene, deuteration of, 68.
 polymerisation of, by γ -radiation, 37.
 thermal decomposition of, 26.
 Feist's acid, structure of, 198.
 Ferrites, crystal structure of, 393.
 Ferrocene, crystal structure of, 109.
 preparation of, 197.
 Ferrocenes, 197.
 Ferroelectrics, 399.
 Film diffusion in ion exchange, 74.
 Flame-photometry, 373.
 Flavaspic acid, structure of, 216.
 Flavogallol, structure of, 239.
 Flavonols, synthesis of, 237.
 Fluoride, test for, 341.
 Fluorine fluorosulphonate (fluorosulphate), 103.
 9 α -Fluoro-derivatives of 11-oxygenated hormones, 221.
 Fluorosulphites, 100.
 Folicanthine, degradation of, 246.
 Force constants, 9.
 Formaldehyde, pyrolysis of, 25.
 Formamidoxime, structure of, 406.
 Formazans, 263.
 Free radicals, 147.
 Gadolinium hydrides, 112.
 Gallium, detmn. of, 335.
 unipositive, 90.
 Gallium dichloride, structure of, 90.
 Gases, radiation chemistry of, 36.
 General and physical chemistry, 7.
 Germanium, detmn. of, 344.
 Germanium monoxide, 93.
 Gibberellic acid, 210.
 Gibberic acid, 210.
*allo*Gibberic acid, 210.
 Glabric acid, structure of, 214.
 Glass-fibre sheets, use of, in ionophoresis, 250.
 D-Glucosamine, derivatives of, 252.
 Glucosinolate ion, structure of, 182.
 Glatathione, crystal structure of, 415.
 Glutnone, structure of, 215.
 1:2-Glycols, oxidation of, by lead tetraacetate, 164.
 Glycols, rates of oxidation of, by lead tetraacetate, 146, 164.
 Glycosulphatase, 327.
 Glycyl-L-alanine hydrochloride hydrate, crystal structure of, 415.
 Glyoxaline, 2-carboxymethylthiodihydro-, rearrangement of, 230.
 Gold, detmn. of, 354.
 test for, 340.
 Gold(I) iodide, structure of, 124.
 Graphite, intercalated compounds of, 91.
 Group II metals in analysis, precipitation of, 338.
 Guaianolides, 207.
 Gypsum, infrared spectrum of, 17.
 structure of, 390.
 Halides, crystal structure of, 394.
 Halides in organic reactions, 170.
 Halogens, detmn. of, in organic analysis, 357.
 Hector's bases, structure of, 230.
 Helvolic acid, structure of, 229.
 Heptafulvalene, formation of, 195.
 Heptafulvene, formation of, 195.
*cyclo*Heptatrienes, 194.
 Heterocyclic compounds, 228.
 systems, crystallography of, 409.
 Heteropolytungstates containing anionic cobalt, 116.
 Hexachloroceric acid-dioxan complex, 112.
 Hexadeuterodiborane-pentaborane reaction, 34.
 6-Hexanolactam, polymerisation of, 58.
n-Hexatriacontane, configuration of, 412.
 Hexoses, oxidation of, with lead tetraacetate, 251.
*cyclo*Hexylammonium chloride, crystal structure of, 412.
 High-frequency titration, 368.
 Histidine hydrochloride hydrate, crystal structure of, 415.
 Holarrhenin, structure of, 227.
 D-Homosteroids, 225.
 Hormones, modified, table of, 223.
 Hydrates, crystal structure of, 396.
 Hydrazine sulphate as redoxometric titrant, 353.
 Hydrides, crystal structure of, 393.
 Hydride ion, transference of, 144.
 Hydrocarbons, aromatic, crystal structure of, 407.
 gaseous, thermal decomposition of, 26.
 infrared spectra of, 13.
 Hydrogen, detmn. of, in organic compounds, 354.
 Hydrogen atoms, addition of, 32.
 Hydrogen bonding, infrared study of, 18.
 Hydrogen bonds, 385.
 Hydrogen-deuterium exchange reaction, 32.
 Hydrogen-nitrogen dioxide reaction, 33.
 Hydrogen chloride hexahydrate, 103.
 Hydrogen fluoride, pure, conductivity of, 102.
 Hydrogen peroxide, crystal structure of, 392.
 formation of, by radiation, 40.
 Hydrogen sulphide-mesitylene complex, 18.
p-Hydroxycinnamyl alcohols, dehydrogenation of, 276.
 Hydroxylamine, structure of, 389.
 Hydroxylamine-*O*-sulphonic acid ("sulphoperamidic acid"), 94.

- Hygromycin, structure of, 186.
 Hyocholic acid, structure of, 220.
 Hypobromite, detmn. of, 353.
 Hypochlorite as oxidimetric titrant, 352.
*iso*Hypophosphate salt, new, 96.
 Hypophosphites, detmn. of, 350, 353.
 Hypophosphite as reducing titrant, 352.
- Ibogaine, structure of, 246.
 Iboluteine, structure of, 246.
 Ice, effects of irradiation on, 43.
 Indeno[2, 1-*a*]perinaphthene, synthesis of, 193.
 Indicators in titrimetric analysis, 345.
 Indigo, crystal structure of, 411.
 Indium, detmn. of, 347.
 Inductive effect, the, 135.
 Infrared methods of analysis, 379.
 Inorganic chemistry, 83.
 Inorganic compounds, infrared spectra of, 9.
 Inorganic electrophoresis in analysis, 378.
 Inorganic gravimetric analysis, 342.
 Inorganic qualitative analysis, 337.
 Inorganic structures, crystallography of, 388.
 Inorganic titrimetric analysis, 345.
 Intensity measurements, infrared, 14.
 Intermetallic compounds, crystal structure of, 398.
 "Intrinsic carbanion stability," 142.
 α -Iodine monochloride, structure of, 104, 388.
 addition compounds of, 104.
 Iodine pentafluoride, structure of, 104.
 Iodoform, infrared spectrum of, 16.
p-Iodonitrosobenzene, crystal structure of, 413.
 Ion exchange, 70.
 equilibria in, 71.
 in non-aqueous systems, 78.
 kinetics of, 74.
 Ion-exchange methods of analysis, 374.
 Ion-exchange resins, exchange capacities of, 76.
 sorption of neutral molecules by, 76.
 use of, in volumetric analysis, 348.
 Ion-exchangers as catalysts, 80.
 in analytical chemistry, 81.
 new and modified, 79.
 Ions, nature of, in ion exchange, 77.
 Iridium(IV), detmn. of, 349.
 Iridium fluorides, 121.
 Iron(II), detmn. of, 336.
 Iron(III), detmn. of, 336, 351.
 reduction of, on resin, 354.
 Iron(IV), preparation of a compound of, 120.
 Iron carbide, crystal structure of, 394.
 Iron(III) chloride decahydrate, 120.
 Iron pentacarbonyl, structure of, 105.
 Isomerism, rotational, 15.
 Isopolytantalate ion, 114.
 Isopolyvanadate ions, 114.
 Isoprenoids, unconjugated, 178.
- Keten, photolysis of, 30.
 "Ketone 250," structure of, 228.
 Kinetics, gas-phase, 20.
 Kinetics in ion-exchange columns, 75.
 Ketones, infrared spectra of, 12.
 α -Kosin, structure of, 216.
 Krypton, adsorption of, 60.
- Labdanolic acid, structure of, 208.
 Lactarovioline, structure of, 130.
 Lantadene A, identity of, with rehmannic acid, 214.
 Lanthanides, 111.
 Lapochenole, structure of, 238.
 Lead, detmn. of, 350.
 Lead carbonate, basic, crystal structure of, 391.
 Lead dioxide, thermal decomposition of, 84.
 Ledol, structure of, 207.
 Leucrose, structure of, 126.
 Lignin, biosynthesis of, 275.
 Lignins, 267.
 degradation of, 268.
 reactive groups in, 273.
 α -Lipoic acid, polymers from, 229.
 (+)- α -Lipoic acid, configuration of, 181.
 Liquids, infrared spectra of, 17.
 non-aqueous, radiation chemistry of, 37.
 Lithium, test for, 339.
 Lithium aluminium hydride, reduction by, 160.
 Lithium metasilicate, crystal structure of, 391.
 Lithium niobate, crystal structure of, 402.
 Lithium tri-*tert*-butoxyaluminium hydride, uses of, 161.
 Loganin, structure of, 199.
 (+)-Lupanine, total synthesis of, 240.
 Lycotoniine, structure of, 248.
 de(oxyethylene)-, structure of, 248.
 Lycopene, synthesis of, 176.
 6 : 7 : 6' : 7'-tetrahydro-, 177.
 Lycorine, structure of, 247.
 dihydro-, stereochemistry of, 247.
- "Macrolides," 185.
 Macromolecules, natural, 257.
 Magnamycin, structure of, 185.
 Magnesium, detmn. of, 343.
 Magnesium hydride, 86.
 Mammals in ring-cleavage of aromatic compounds, 280.
 Manganese, detmn. of, 350, 352.
 univalent, 119.
 Manganese(II), oxidation of, to permanganate, 354.
 Manganese dioxide, oxidation by, 165.
 Marrubiin, 208.
 Masticdienonic acid, structure of, 212.
*iso*Masticdienonic acid, structure of, 212.
 Melacacidin tetramethyl ether, oxidation of, 238.
 Melaleucic acid, structure of, 214.
 Melamine, structure of, 129.

- Mercury, detmn. of, in organic compounds, 357.
- Mercury(I), detmn. of, 334.
- Mercury(II), detmn. of, 344.
- Mercury(II) amidofluoride, constitution of, 125.
- Mercury(I) fluoride, Hg-Hg distance in, 125.
- nitrate, Hg-Hg distance in, 125.
- perchlorate as reducing titrant, 353.
- Mercury(II) oxide, crystal structure of, 392.
- Mesitylene-hydrogen sulphide complex, 18.
- Meso-ionic compounds, 230.
- Metabolic pathways, intermediates in, 281.
- Metal acetylide complexes, 107.
- Metallic complexes of aromatic hydrocarbons, 197.
- Metallo-organic compounds, infrared spectra of, 9.
- Methoxyl determination, 357.
- Methyl acrylate, transfer constants in polymerisation of, 53.
- N*-Methyl, determination of, 357.
- Methyl radicals, reaction of, with nitric oxide, 30.
- Methylaluminium halides, structure of, 90.
- 3-Methylcholestan-3-ols, stereochemistry of, 218.
- (+)-*S*-Methyl-L-cysteine sulfoxide, occurrence of, 182.
- Methylene radical, the, 151.
- 24-Methylenecholesterol, occurrence of, 227.
- 1-Methyl- α -fenchene, pure, 204.
- Methylguanidinium nitrate, crystal structure of, 415.
- 4-Methylcyclohexane-1 : 2-dione, use of, in analysis, 335.
- Methymicin, structure of, 185.
- Meyerhofferite, crystal structure of, 384.
- Micro-organisms, oxidative metabolism by, 284.
- Micro-organisms in ring-cleavage of aromatic compounds, 280.

- Organic structures, crystallography of, 405.
- Organophosphorus compounds, 294.
- hydrolysis of, by enzymes, 303.
- Organosilicon compounds, cyclic, 93.

- Osazones of sugars, structure of, 253.
 Osmium(IV), ethylenediamine complexes of, 120.
 Osmium(VI), detmn. of, 336.
 test for, 341.
 Oxazirines, 229.
 Oxidation in organic chemistry, 164.
 Oxidation of organic compounds, 144.
 Oxides, crystal structure of, 392.
 ferroelectric properties of, 401.
 16-Oxotestosterone, formation of, 222.
 Oxy-acids, structure of, 390.
 Oxyanin-B, synthesis of, 237.
 Oxygen, detmn. of, in organic compounds, 355.
 Ozonides, reduction of, by triphenylphosphine, 163.

 Palladium, detmn. of, 335.
 Palladium(II), detmn. of, 344.
 Palladium(II) complexes with *o*-phenylene-bisdimethylarsine, 122.
 Parkeol, structure of, 212.
 Particle diffusion in ion exchange, 74.
 Patchouly alcohol, structure of, 206.
 "Pelletierine," natural, identity of, with isopelletierine, 241.
 Pentaborane-hexadeuterodiborane reaction, 34.
 Pentacene, configuration of, 409.
*cyclo*Pentadiene-metal complexes, 108.
 Pentafluorosulphur hypofluorite, 103.
 Peptides, infrared spectra of, 13.
 Perchloric acid, catalytic action of, in certain organic reactions, 141.
 Perchloric acid monohydrate, Raman bands in spectrum of, 10.
 Perchloryl fluoride, preparation and structure of, 103.
 Perinaphthenylium salts, 193.
 Periodic acid, detmn. of, 354.
 Permanganate titration, substitutes for Zimmermann-Reinhardt reagent in, 333.
 "Permolybdic acid," 116.
 Peroxychromates, double, 116.
 Phenanthrenes, synthesis of, 187.
 Phenazine, crystal structure of, 409.
 Phenol, oxidative metabolism of, by micro-organisms, 294.
 Phenols, 189.
 monohydric, oxidation of, 238.
 Phenyl isocyanate dimer, crystal structure of, 413.
 Phenylpropionic acid, dimeric, 406.
 Phloroglucide, structure of, 189.
 Phosphates, "condensed," 97.
 detmn. of, 351.
 structures of, 391.
 Metaphosphates, colloidal, structure of, 97.
 Phosphides, crystal structure of, 394.
 Phosphite, detmn. of, 353.
 Phospholipids, 181.
 Phosphoric acid, structure of, 390.
 triamide, 97.
 Phosphoronitrile fluorides, 96.
 Phosphorous acid, detmn. of, 350.
 Phosphorus oxychloride, addition compounds of, 97.
 pentahalides, mixed, 96.
 sulphides, structure of, 389.
 Phosphorylated enzymes, re-activation of, 298.
 Photochemistry, 44.
 Photometric titration, 368.
 Physalien, 176.
 Pilocerine, structure of, 242.
 Pinacol \rightarrow pinacolone change, 155.
 Pinidine, structure of, 241.
 Plants in ring-cleavage of aromatic compounds, 280.
 Platinous complexes, *trans*-directing effect in, 107.
 Pleiadene, synthesis of, 193.
 Plutonium, structures of allotropes of, 388.
 Plutonium hexafluoride, 118.
 hydrides, 118.
 nitrate, 118.
 nitride, 118.
 Polarography, 358.
 Polonium(IV), extraction of, into ethers, 102.
 Polonium, various derivatives of, 102.
 Polyarsenates, lithium and sodium, structures of, 391.
 Polycyclic compounds, aromatic, 187.
 Polymerisation, initiation constants in, 51.
 ionic, 55.
 kinetics of, 48.
 radiation-induced, 38.
 radical, 47.
 retardation and inhibition of, 52.
 ring, 58.
 stereospecific, 57.
 Polymers, degradation of, 59.
 irradiation of, 43.
 Polynucleotide phosphorylase, 263.
 Polysaccharides, 257.
 Polystictin, 234.
 Porphyrilic acid, structure of, 238.
 Porphyrins, 236.
 Potassium detmn. of, 335.
 as tetraphenylboron salt, 342.
 in natural salt deposits, 342.
 Potassium carbonate as acidimetric standard, 349.
 Potassium fluororuthenate(III), 120.
 Potassium glucose 6-sulphate, impure, 320.
 Potassium metavanadate, crystal structure of, 391.
 Potassium nitrosohydroxylaminesulphonate, 94.
 Potassium vanadates, 115.
 Potential functions, 7.
 Potentiometric titration, 370.
 Precipitation from homogeneous solution, 343.
 Pregnane side chain, reactions involving, 222.
 Progoitrin, 182.

- cyclo*Propane, isomerisation of, 25.
polymerisation of, 58.
Propyl radicals, *n*- and *iso*-, decomposition of, 28, 29.
Proteins, infrared spectra of, 13.
Pteridine, crystal structure of, 410.
Pteridine and its simple derivatives, properties of, 235.
Pteridines, synthesis of, 235.
Pulcherrimic acid, structure of, 232.
Pummerer's ketone, 238.
Purines, 235.
 α -6-Purinylamino succinic acid, structure of, 235.
Pyrazole, chlorination of, 229.
Pyridine, 4-phenyl-, preparation of, 231.
2-trifluoromethyl-, preparation of, 231.
Pyridine-sulphur dioxide complex, 18.
Pyrimidines, 5-hydroxy-, synthesis of, 232.
Pyrochlores, crystal structure of, 403.
Pyrophosphoryl chloride, 96.
Pyrosulphuryl chloride, ammonolysis of, 100.
Pyrroles, *N*-aryl-, preparation of, 229.
Pyrrolidines, 2 : 3-dioxo-, preparation of, 229.
Pyrrolones, preparation of, 229.
Pyrylium salts, formation of, 231.
- Quantum organic chemistry, 126.
Queretaroic acid, structure of, 213.
Quinol as redactometric reagent, 349.
Quinones, 190.
- Radiation chemistry, 35.
Radicals, data for reactions of, 27.
Rauvomitine, structure of, 245.
 S_N Reactions, 158.
Reactions involving radicals, 27.
Rearrangements in organic chemistry, 152.
Reduction in organic chemistry, 159.
Reductor methods, 353.
Rehmannic acid, identity of, with lantadene A, 214.
Reserpine, total synthesis of, 243.
*pseudo*Reserpine, 244.
Rhenium, preparation of, in a state of high purity, 119.
Rhodium trichloride, reaction of, with *cyclo*octa-1 : 5-diene, 108.
Ribonuclease action, reversibility of, 262.
Ribonucleic acid, hydrolysis of, 263.
Ribonucleic acids, 260.
D-Ribose 1 : 3 : 5-tribenzoate, 254.
Ring-oven technique, applications of, 339.
"Rivanol," name of and use of, 337.
"Rongalite C," crystal structure of, 412.
Rubber, "natural," synthesis of, 57.
Rutile, crystal structure of, 392.
- Samarium(II) oxide, 112.
Sanshool I, non-identity of, with spilanthol, 180.
Santonins, 205, 206.
Scandium, detmn. of, 347.
Scandium group, 111.
- Scopolamine, total synthesis of, 239.
(+)-Sedridine, structure of, 241.
Selenic acid, hydrates of, 100.
Selenium, detmn. of, 352.
Selenoindigo, crystal structure of, 411.
Selenosemicarbazide, 92.
"Sequential induction," enzymic, 281.
"Serposterol," 222.
Sesquithylenediaminetrimethylplatinic iodide, 123.
Sesquiterpenes, 205.
Silicon, adsorption of gases by, 63.
detmn. of, in organic compounds, 355.
Silicon-thorium system, 114.
Silicon dibromide, 92.
oxyhydride, 92.
sesquioxide, 92.
subhydride, 92.
tetrachloride-ammonia, true composition of, 93.
Silver, test for, 340.
Silver iodide ions, complex, 124.
Silver(II) oxide, use of, as oxidant, 333.
Silver perchlorate-dioxan, structure of, 124.
Silver perfluorobutyrate, crystal structure of, 406.
Silver permanganate as combustion catalyst, 355.
Silyl compounds, 93.
Sinigrin ion, structure of, 182.
Small rings, heterocyclic, 228.
Sodamide, crystal structure of, 394.
Sodium, detmn. of, 336.
Sodium atoms, reaction of, with aromatic halides, 32.
Sodium-naphthalene complex as initiator in anionic polymerisation, 56.
Sodium amidophosphate, thermal decomposition of, 98.
borohydrides, 87.
borohydride, uses of, 162.
carbonate as acidimetric standard, 348.
diamidophosphate, thermal decomposition of, 98.
dithionite, structure of, 100.
hexafluororhodate(II), 121.
"metabismuthate," structure of, 99.
metagermanate, structure of, 391.
metaperiodate, oxidation by, 164.
nitritotriphosphate, 98.
sesquicarbonate, crystal structure of, 385.
triethoxyaluminium hydride, uses of, 161.
triisopropoxyborohydride, uses of, 162.
tropolonate, crystal structure of, 413.
- Solanesol, occurrence of, 179.
Solanidol, configuration of, 227.
Solasodine, configuration of, 226.
Solids, radiation chemistry of, 43.
Solutions, aqueous, radiation chemistry of, 39.
infrared spectra of, 17.
Spectra vibration-rotation, 8.
Spectroscopic methods of analysis, 378.

- Spectroscopy, infrared and Raman, 7.
 Sphingosine, configuration of, 181.
 Spilanthol, non-identity of, with sanshoöl, 180.
 Squalene, biological cyclisation of, 203. syntheses of, 178.
 Standards for volumetric analysis, 348.
 Sterculic acid, structure of, 180.
 Stereochemistry, 201.
 Steroid alkaloids, 226.
 Steroid sapogens, 226.
 Steroid-sulphatase, 328.
 Steroids, 216.
 metabolism of, 305.
 C_{18} , C_{19} , C_{20} , biosynthesis and catabolism of, 311, 313, 316.
 Streptonivcin, structure of, 236.
 Strontium, detmn. of, 342.
 test for, 341.
 Strontium-niobium bronzes, 84.
 Strontium hydride chloride, 86.
 Subercolic acid, formation of, 184.
 Substitutions, electrophilic, 190.
 "6-Succinaminopurine," structure of, 235.
 Sugars, 250.
 compounds obtained from, with amines, hydrazines, etc., 252.
 Sulphamic acid, structure of, 389.
 Sulphamide, structure of, 389.
 Sulphatases, 318.
 Sulphate, detmn. of, 350.
 Sulphates, ferroelectric properties of, 403.
 Sulphate esters, preparation of, 398.
 Sulphides, crystal structure of, 394.
 Sulphites, detmn. of, 350, 354.
 "Sulphoperamidic acid." See Hydroxylamine-*O*-sulphonic acid.
 Sulphur, crystallography of allotropes of, 388.
 detmn. of, in organic compounds, 356.
 in steels, 343.
 elementary, test for, 341.
 Sulphur di-imide, derivatives of, 107.
 Sulphur dioxide-pyridine complex, 18.
 Sulphuric acid, structure of, 390.
 Sulphuric acid system, 99.
 Sydnone, halogenation of, 230.
 Tasmanone, structure of, 216.
 Taspine, structure of, 242.
 Tazettine, structure of, 247.
 Technetium, valency states of, 119.
 Tellurium, detmn. of, 343.
 Terminolic acid, 213.
 Terpenes, 202.
 Tetraethylammonium heptaoidide, structure of, 104.
 Tetramethylammoniumenneaoidide, structure of, 104.
*cyclo*Tetramethylenetetranitramine, crystal structure of, 411.
 3 : 7 : 12 : 16-Tetramethyloctadeca-3 : 7 : 9 : 11 : 15-pentaene-5 : 13-diyne-1 : 18-dicarboxylic acid, synthesis of, 177.
 Tetraphosphoryl chloride, 96.
 Tetraphyllicine, structure of, 245.
 Tetrathionitrosyl compounds of palladium and platinum, 123.
 s-Tetrazine, crystal structure of, 409.
 Tetrazole, 5-imino-1 : 3-dimethyl-, dipole moment of, 230.
 Thermal vibrations in crystals, 385.
 (\pm)-Thermopsine, 241.
 Thianthren, configuration of, 411.
 Thioacetamide, use of, in analysis, 337.
 (\pm)-5 : 8-Thioctic acid, 229.
 Thioctic acid. See (+)- α -Lipoic acid.
 Thioindigo, crystal structure of, 411.
 Thionyl tetrafluoride, 103.
 Thiosulphate as oxidimetric titrant, 352.
 Thiourea, detmn. of, 350.
 Thorium, detmn. of, 335, 336, 346, 347.
 Thorium, tests for, 340.
 Thorium-silicon system, 114.
 Thymidine, structure of, 264.
 Tiglic acid, configuration of, 405.
 Tigogenin, 226.
*neo*Tigogenin, 226.
 Tin(II), test for, 340.
 Tin(IV), detmn. of, 336.
 Titanium, alkoxy-derivatives of, 113.
 oxides of, 84.
 salts of, 113.
 Titanium chlorides, lower, thermodynamic properties of, 113.
 Titanyl amide, 113.
 Titrimetric reagents, 349.
 Tomatidine, configuration of, 226.
 Transfer in polymerisation, 53.
 Transfer constants in polymerisation of methyl acrylate, 53.
 Transition elements, 105.
 Transuranic elements, 115.
 crystal structure of, 399.
 s-Triazine, crystal structure of, 409.
 s-Triazines, 233.
 Trifluoroacetoneitrile-butadiene reaction, 33.
 Trifluoromethyl radical, decomposition of, 28.
 Trimethylindium, 90.
 2 : 4 : 6-Trinitrophenols, use of, in analysis, 333.
 Triphenylphosphine, use of, in reduction of ozonides, 163.
 Triphenylphosphonium *cyclopentadienyl*-ide, 192.
 Tris(trifluoromethyl)antimonic acid, 99.
 Triterpenes, 211.
 Tricyclovetivene, structure of, 206.
 Tropolones, 195.
 Tropone system, resonance energy of, 196.
 "Tropylidene," structure of, 194.
 Tropylium salts, 194.
 Tryptophan, oxidation of, by micro-organisms, 290.
 Tungsten(VI) fluorides, complex, 117.
 Uranium, detmn. of, 344.
 Uranium, organic compounds of, 117.
 Uranium(IV), detmn. of, 352, 353.

Uranium(vi), detmn. of, 352, 353.
Uranium(iv) halides, mixed, 117.
Uranium(vi) oxide, hydrates of, 117.

Vanadium, dipyriddy complexes of, 114.
Vanadium(v), detmn. of, 352.
 tests for, 341.
Vinylideneamine, configuration of, 412.
Visamminol, structure of, 239.
Vitamin A, 174.
Vitamin B₁₂, crystal structure of, 415.

Water vapour, β -irradiation of, 37.
Wittig reaction, the, 169.

Xanthates of D-glucose, 255.

Xanthazole, crystal structure of, 411.
Xanthostemone, structure of, 216.

(\pm)-Yohimbane, synthesis of, 242.
 16-methyl-, synthesis of, 243.

Zeaxanthin, 176.
*iso*Zeaxanthin, 175.
Zerumbone, structure of, 205.
Zierazulene, structure of, 196.
Zinc, test for, 340.
Zinc chloride, anhydrous, m. p. of, 124.
 terpyridyl complex of, 125.
Zirconium, detmn. of, 344, 347.
Zirconium, test for, 340, 341.
Zirconium tetrafluoride hydrates, 114.
