

Analytical Proceedings

Proceedings of the Analytical Division of The Royal Society of Chemistry

CONTENTS

- 221 Analytical Division Distinguished Service Award**
- 221 Saluting Mass Spectrometry Through Robert Boyle**
- 222 Report of Meeting**
- 223 New Forum for Water Industry Research**
- 223 SAC Gold Medal**
- 223 Ronald Belcher Memorial Lectureship**
- 225 SUMMARIES OF PAPERS**
- 225 Chirality**
- 225** 'Target-directed Design of Chiral Stationary Phases' by William H. Pirkle, Christopher J. Welch, J. Andrew Burke and Bo Lamm
- 226** 'Chiral Discrimination and its Impact on the Design of Bioactive Molecules' by Patrick Camilleri
- 228** 'Chiral Analysis by Gas Chromatography—Principles and Applications' by Volker Schurig, M. Jung, S. Mayer, D. Schmalzing and M. Schleimer
- 229** 'Use of Cyclodextrins and Their Derivatives for Chiral Analysis by High Field Nuclear Magnetic Resonance Spectroscopy' by Allan Taylor, Catherine A. Blackledge, Jeremy K. Nicholson, David A. R. Williams and Ian D. Wilson
- 232** 'Racemic Therapeutics: A Source of Problems to Chemists and Physicians' by Everardus J. Ariëns
- 235** 'Cyclic Peptides as Chiral Selectors in High-performance Liquid Chromatography' by Fiona L. Birkinshaw and David R. Taylor
- 238** 'Examination of Fruit Juices and Ciders for Adulteration by Analysis of (–)-Malic Acid Using High-performance Liquid Chromatography with Dual Ultraviolet/Polarimetric Detection' by David M. Goodall, Zecai Wu and Stephen G. Lisseter
- 240** 'Ultra-low Flow Preparative Chiral High-performance Liquid Chromatography on Cellulose Triacetate' by Christopher D. Bevan and Ian M. Mutton
- 242** 'High-performance Liquid Chromatographic Determination of the Enantioselectivity of a Novel Reformatsky Reaction' by Caroline P. Hargrave and David G. Waters
- 245** 'Direct Analysis of Simple Enantiomeric Alcohols by Capillary Gas–Liquid Chromatography Using a Cyclodextrin-based Stationary Phase' by Ian D. Smith and Colin F. Simpson
- 247** 'Method Development Techniques on a New Multimodal Chiral Liquid Chromatographic Column' by D. M. Wallworth, T. E. Beesley and D. W. Armstrong
- 249** 'Comparison of Spherisorb Chiral 1 and Chiral 2 High-performance Liquid Chromatographic Columns for the Resolution of Some Drug Enantiomers' by Robin Whelpton and Dennis G. Buckley
- 251** 'Determination of Enantiomeric Excess by Inclusion Complexation using Nuclear Magnetic Resonance Spectroscopy' by Jeffrey J. Richards and Michael L. Webb
- 253** 'Determination of the Ratio of *R*- and *S*-Ibuprofen in Urine Using a Solid-Phase Extraction Procedure Followed by High-performance Liquid Chromatography with Dual Polarimetric and Ultraviolet Absorbance Detection' by David M. Goodall, Melanie J. Riley, Zecai Wu and Ian D. Wilson
- 'Quantification and Enantiomeric Purity of Pharmaceuticals in Dosage Form Using Flow Injection Analysis With Dual Absorbance and Polarimetric Detection' by Gaoyuan Liu, David M. Goodall and John S. Loran

continued inside back cover

Typeset and printed by Black Bear Press Limited, Cambridge, England

continued from back cover

258 Research Topics in Chromatography

- 258** 'Resolution of Racemic Pharmaceuticals by High-performance Liquid Chromatography Using β -Cyclodextrin in the Mobile Phase' by Andrew D. Cooper, Terry M. Jefferies and Richard M. Gaskell

260 Research and Development Topics in Analytical Chemistry

- 260** 'Method for the Determination of Silicon in Biological Samples Using Electrothermal Atomic Absorption Spectrometry With Matrix Modification' by Alexis J. Holden, David Littlejohn and Gordon S. Fell
- 262** 'Light Sources, Spectrometers and Detectors for Continuum Source Atomic Absorption Spectrometry' by Clare M. M. Smith, Robbin Nichol, David Littlejohn and Charles Perkins

265 Equipment News

269 Toxicity Review of Xylenes

270 Conferences and Meetings

270 Courses

iii Analytical Division Diary
