

**MINISTRY OF SUPPLY** invites applications from **CHEMISTS** for unestablished posts in Experimental Officer Class in Research and Development Establishments, mainly in S. England.

Candidates must possess Higher National Certificates or Higher School Certificate or equivalent. General chemical experience, particularly in fields of physical chemistry and chemical engineering is required. Special knowledge or interest in any of the following fields would be an advantage: Modern analytical methods; thermo-chemistry and combustion; stability and sensitivity of explosives; instrumentation; plastics (with special reference to aircraft materials); chemical plant development; or library and information work.

Grade and starting pay assessed on age, qualifications and experience. Salary ranges:

Senior Experimental Officer	..	£705-£895
Experimental Officer	..	£495-£645
Asst. Experimental Officer	..	£220 (at age 18) -£460

Rates for women somewhat lower above age 21.

Write, quoting F.563/49/B.O. to Technical and Scientific Register (K), York House, Kingsway, London, W.C.2, for application forms which must be returned by 4th January, 1950.

**THE UNITED BIRMINGHAM HOSPITALS**  
**THE CHILDREN'S HOSPITAL**  
Ladywood Road, Birmingham, 16

**A**PPPLICATIONS are invited from candidates (female) with an honours degree in Chemistry or Biochemistry for an appointment in the Biochemical Department of this Hospital. Experience in methods using micro quantities of material or experience in a hospital biochemical laboratory would be a desirable qualification. Commencing salary £550. Appointment subject to National Health Service Superannuation Regulations and to the passing of a medical examination.

Typewritten applications, with names of three referees, should be forwarded as soon as possible to the Bio-chemist.

**N. R. WINWOOD,**  
*House Governor.*

**THE BRITISH DRUG HOUSES LTD.,** London, require an experienced Analyst, preferably with a pharmaceutical qualification, for a senior position in their Analytical Department. Salary according to experience and qualifications. Write giving full particulars to the Personnel Manager (ref. HAC/RES), The British Drug Houses Ltd., Graham Street, City Road, London, N.1.

**IMPERIAL CHEMICAL INDUSTRIES LIMITED,** Dye-stuffs Division, have a vacancy for an Analytical Research Chemist for work in the inorganic field, including boiler-water treatment. Candidates, aged up to 30, must possess a University Degree with Honours in Chemistry or an equivalent qualification, and should have had good experience in inorganic analysis. Salary in accordance with experience and qualifications. Replies in writing to Staff Department, Hexagon House, Blackley, Manchester, 9. Ref. D.A.D.

**A**NALYST required for a laboratory engaged in the examination of medicinals and fine chemicals. Applicants should possess an Honours Degree in Chemistry or A.R.I.C. and preferably should have had some industrial analytical experience. Salary to be commensurate with experience and qualifications. Applications should be made to the Divisional Director of Research, Fisons Limited, Research Laboratories, Biological and Fine Chemical Division, Derby Road, Loughborough, Leics.

**JUNIOR CHEMIST** required for general analytical work in laboratory of large Engineering Company in North London. Applicants should possess B.Sc., Chemistry, or equivalent, but industrial experience is not essential. Write Box 3727 *THE ANALYST*, 47, Gresham Street, London, E.C.2

**A**NALYTICAL and Consulting Chemists' practice for sale. Established 50 years. Owner retiring. Write Box No. 3725, *THE ANALYST*, 47, Gresham Street, London, E.C.2

**WANTED.** *Analyst, Biochem. J., Nature, J. Soc. Divers' and Col., Trans. Far. Soc.,* and any other chemical journals. Box 3726, *THE ANALYST*, 47, Gresham Street, London, E.C.2.

# HEFFER'S BOOKSHOP

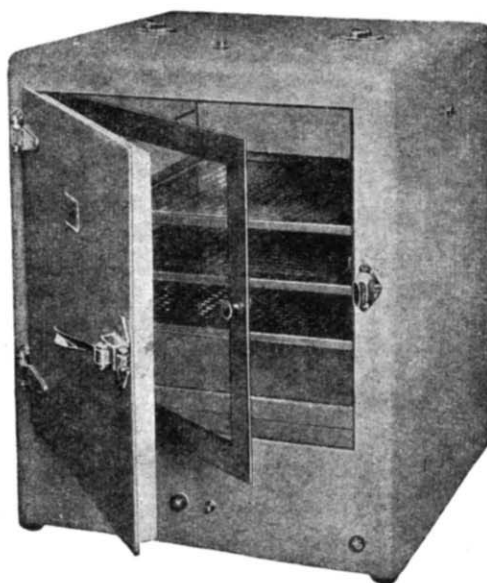

For many years Heffer's have specialised in the supply of scientific books, both new and secondhand, to all parts of the world. They are always glad to purchase complete libraries or smaller collections of books. Particularly wanted are complete sets or long runs of *The Analyst*, as indeed of any important scientific and technical journals.

¶ Now ready: Catalogue 627  
— Scientific, Medical and  
Technical Books ; antiquarian,  
new and forthcoming.

## THE MARKS ON SCOTTISH PLATE

THE CASTLE

DEACON'S MARK

THE THISTLE

### Edinburgh

HALLMARKING of Scottish Plate began in Edinburgh, and as the craftsmen were not influenced by any other people outside the border, their ideas were unique, not only in respect to the work produced, which covered the whole range of domestic and ecclesiastical plate, but also to their special system of Hallmarking.

In 1483, a Deacon (or Assay Master) was appointed by law to add his mark to that of the maker's, *so that if any deceit was discovered afterwards, both the deacon's and the maker's lives were held forfeit.* The

Deacon's mark which was peculiar only to Edinburgh was substituted in the year 1759 by the thistle mark which is still used to-day.

The town mark, apart from slight alteration in design from time to time, has always been the castle, which was taken from the arms of the burgh (Argent on a rock proper, a castle, triple towered and embattled, sable). This might be confused with some English town marks, but the place of origin can always be determined if the thistle or the deacon's mark is evident

## THE HALLMARK OF LABORATORY APPARATUS

*This Trade Mark is a guarantee of high quality  
materials, a meticulous standard of accuracy,  
craftmanship and scientific design*

### BAIRD & TATLOCK (LONDON) LTD

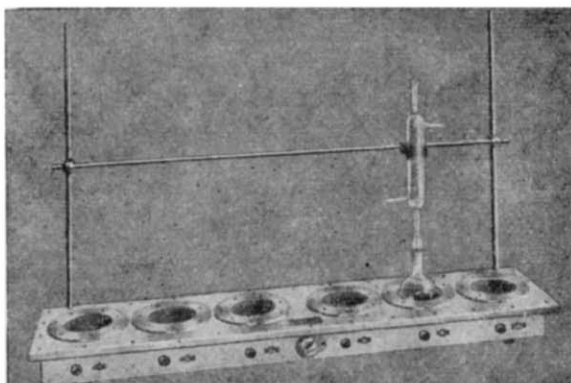

*Scientific Instrument Makers*

FRESHWATER ROAD, CHADWELL HEATH, ESSEX

## EXTRACTION UNITS

Patents appl. for

The most up-to-date electric appliance for Soxhlet extractions and other tests. Standard units for 3 or 6 flasks 100/150 ml. or 200/350 ml. with built-in individual or unit control. This apparatus and the well-known Electrothermal Heating Mantle are guaranteed for 12 months and are available from all laboratory suppliers.

**Safe, efficient and economical in use**
