Food & Function

Linking the chemistry and physics of food with health and nutrition

Food science and nutrition is a highly multidisciplinary area. We know it can be difficult to keep abreast of each other's work, especially when there is not enough time in the day and the pile of work keeps growing.

Wouldn't it be great if there was a journal which pulled together high impact chemical and physical research linking to human health and nutrition? Just one platform to find what you need in the field, and reach exactly the right audience when you publish your work.

Food & Function provides a dedicated venue for physicists, chemists, biochemists, nutritionists and other health scientists focusing on work related to the interaction of food components with the human body.
