Society Publishing Superior Performance

ACS and RSC: Striking Results.

The comparison is striking. When the median ISI® impact factors of leading scientific publishers in chemistry are viewed, the Journals of the American Chemical Society and the Royal Society of Chemistry truly stand out. They rank higher in median ISI® impact factor in the seven ISI® core chemistry categories¹ than commercial publishers.

Then again, isn't that what you expect from society publishers?

1. Based on the 2005 ISI® Journal Citation Reports. The seven ISI® chemistry categories include: Analytical, Applied, Inorganic and Nuclear, Medicinal, Multidisciplinary, Organic and Physical Chemistry.

2. Based on the number of publications each publisher produced in 2005 that are included in the ISI® core chemistry categories referenced above.

ACS PUBLICATIONS
HIGH QUALITY. HIGH IMPACT.
