# Missing something?

06110614

Until now you have enjoyed free access to *Soft Matter*, the #1 journal on the generic science underpinning the properties and applications of soft matter.

Success since launch now means that *Soft Matter* has separated from its print and online host journals, *Journal of Materials Chemistry*, *Physical Chemistry Chemical Physics*, *Organic & Biomolecular Chemistry* and *Lab on a Chip*, to become a solo publication.

If you're missing the leading-edge research appearing in *Soft Matter*, let your librarian know. Fill in the online recommendation form at [www.rsc.org/libraryrecommendation](http://www.rsc.org/libraryrecommendation)

**Soft Matter** – if you're not reading it, you're missing out!
