

INDEX OF SUBJECTS.

- ACETANILIDE, *N*-chloro-, transformation of, 202.
- Acetic acid, detection of, 392.
lead salt, reaction of, with ethylene glycol, 92.
octadecyl ester, films, X-ray structure of, 106.
undecenyl ester, hydrogen bromide addition to, 222.
vinyl ester, polymerisation of, 80.
- Acetic acid, thiol-, addition of, 235.
- Acetic anhydride, reaction of, with ethyl alcohol, 84.
reagent from, for cyclic ketone syntheses, 303.
- Acetoacetic acid, ethyl ester, Claisen synthesis of, 213.
- Acetoacetic acid, α -bromo-, ethyl ester, rearrangement of, 225.
- 3 : 4-Acetone β -1 : 6-anhydrogalactose, 258.
- Acetone 5 : 6-anhydroglucofuranose, 259.
- Acetone 5 : 6-anhydroglucose, 264.
- Acetone 6-diphenylaminoglucose, 264.
- Acetone *d*-glucofuranose, 265.
- Acetone *L*-idofuranose, 265.
- Acetylene, hydrogen bromide addition to, 219.
polymerisation of, 68.
spectrum of, ultra-violet, 59.
- Acetylenic compounds, methyl group bond-length in, 176.
- N*-Acetyl-*N*-methyl-*p*-toluidine-3-sulphonic acid, 256.
- Acids, carboxylic, electronic structure of, 56.
dicarboxylic, dissociation constants of, 46.
organic, dissociation constants of, 45, 187.
- dl*-Acids, resolution of, 251.
- Acraldehyde, reaction of, with cyclopentadiene, 65.
- Actinium-*K*, 23.
- Actino-uranium, 11.
- Acrylic acid, hydrogen bromide addition to, 223.
methyl ester, polymerisation of, 76.
- Acylanilides, *N*-halogeno-, transformations of, 203.
- Adenyl pyrophosphate in muscle, 358.
- Adenylic acid, phosphorylation of, 340.
- Adermin, 190, 325.
- Adsorbents for chromatographic analysis, 413.
for gases, 409.
- Adsorption in analysis, 413.
on films, 114.
resolution by, 252.
- Ætiocholane, 295.
- Agar-agar, 3 : 6-anhydro-*l*-galactose derivative from, 269.
- Air. See Atmosphere.
- 6-*N*-Alaninoglucose, 264.
- "Albumin gland" in snails, 355.
- Alcohols, aromatic, cyclo-dehydration of, 288.
unsaturated, cyclo-dehydration of, 287.
- dl*-Alcohols, resolution of, 251.
- Aldehydes, detection of, 394.
electronic structure of, 56.
- Aldol condensation, 211.
- Aldols, 212.
- Alginic acid, structure of, 379.
- Alkali fluorides, equilibria of, with hydrofluoric acid and water, 134.
hydrides, heats of formation of, and of deuterides, 153.
- Alkaline-earth metals, determination of, in thermionic valve filament coatings, 405.
sulphides, lattice energies of, 151.
- Alkaloids, 326.
identification of, 390.
- Alkanna tinctoria*, 281.
- Alkannin, structure of, 281.
- Alkyl groups, migration of, in nucleus, 210.
rearrangement of, 197.
halides, spectra of, 55.
iodides, reaction of, with amines, 84.
- Alkylphenanthrenes, preparation of, 290.
- Alkylphenanthrenes, preparation of, 290.
- Allene compounds, resolution of, 239.
- Alloys, analysis of, 396.
non-ferrous, analysis of, 390.
order-disorder in, 42.
- Allyl aryl ethers, rearrangements of, to nuclear-alkylated phenols, 205.

- Allyl bromide, hydrogen bromide addition to, 220, 227, 229.
 Allylbenzene, hydrogen bromide addition to, 222.
d-Altrosan, 259.
 Altrose, 2-amino-, derivatives of, 271.
 Aluminium chloride, solubility of, in carbonyl chloride, 144.
 fluoride, equilibrium of, with hydrofluoric acid and water, 134.
 oxide, as adsorbent in chromatographic analysis, 413.
 potassium carbonate, 130.
 sulphate, equilibrium of, with lithium sulphate and water, 132.
 Amidines, rearrangements of, 199.
 Amines, aliphatic, separation of, by adsorption, 414.
 reaction of, with alkyl iodides, 84.
 tertiary, resolution of, 243.
 Amino-acids, adsorption of, 414.
 analysis of, in proteins, 351.
 detection of, 393.
 Amino-sugars, 269.
Ammi visnaga, 315.
 Ammonia, compounds of, with sulphur dioxide, 142.
 dipole moment and molecular shape of, 240.
 liquid, reactions in, 136.
 spectrum of, absorption, 241.
 electronic, 55.
 Ammonium bromide, equilibrium of, with cobalt bromide and water, 132.
 cadmium chloride, crystal structure of, 173.
 chloride, specific heat of, 155.
 heptafluoroaluminate, crystal structure of, 168.
 heptafluorozirconate, crystal structure of, 168.
 nitrate and sulphate, equilibrium of, with water, 134.
 salts, activities of, in ammonia solution, 140.
 quaternary, rearrangements of, 199.
 selenate, equilibrium of, with calcium selenate and water, 132.
 sulphate, equilibrium of, with sulphuric acid and water, 133.
 Amylase, soya bean, 377.
 Amylases, action of, on starch, 374.
 activity of, effect of heavy water on, 376, 377.
 Amylopectin, separation of, from starch, 374.
 Amylose, separation of, from starch, 374.
Anabasis aphylla, 329.
 Anæmia, nutritional, prevention and cure of, 349, 350.
 Analysis, chromatographic, 412.
 crystallo-chemical, 398.
 gas, 405.
 inorganic, detection of impurities in, 415.
 microscopical, 388.
 quantitative, 395.
 of dusts and smokes, 402.
 spectroscopic, quantitative, of gases, 411.
 sulphide precipitation in, 416.
 Aneurin as plant growth substance, 366.
 as yeast growth substance, 371.
 determination of, 371.
 See also Vitamin-B₁.
Angelica glabra, 315.
 Anhydro-acetone glucofuranoses, 261.
 3 : 6-Anhydrogalactose, 262.
 3 : 6-Anhydroaldehyde-galactose dimethyl acetal, 269.
 3 : 6-Anhydroglucose, 259.
 Anhydrogossypol, 284.
 2 : 3-Anhydromannose, action of ammonia on, 270.
 3 : 6-Anhydromannose, 262.
 Anhydromethylallosides, 261.
 3 : 4-Anhydro- β -methylgalactopyranoside, 260.
 3 : 4-Anhydromethylgalactoside, 261.
 3 : 6-Anhydro- $\alpha\beta$ -methylglucopyranoside, 267.
 3 : 6-Anhydro- β -methylglucopyranoside, 267.
 α -3 : 6-Anhydromethylglucopyranoside, conversion of, into the furanoside, 268.
 2 : 3-Anhydromethylmannoside, 261.
 Anhydro-sugars, 258.
 Aniline, determination of, 409.
 Anilines, nuclear-alkylated, formation of, 204.
 Anions, adsorption and detection of, 415.
 Anthracene, crystal structure of, 179.
 Antimony as fission product of uranium, 12.
 detection of, in presence of tin, 417.
 Antimony* pentachloride, reaction of, with potassium iodide in liquid sulphur dioxide, 142.
 Aphyllidine, 329.
 Aphylline, 329.
 β -Apo-2-carotenal, 337.
 Apogossypol, 285.
 Apples, araban of pectin from, 378.
 Araban, pea-nut, 378.
Arachis hypogaea, seeds, constituents of, 378.
Arbacia pustulosa, 281.
 Arsenic, determination of, 418.

- Arsenic compounds, stereochemistry of, 246.
*tri*hydride, determination of, 409.
 Artabotrine, 331.
 Artabotrinine, 331.
Artabotrys suaveolens, 331.
 β -Arylethylcyclohexanols, cyclisation of, 288.
 β -Arylethylcyclopentanol, cyclisation of, 288.
Aspergillus glaucus, pigments of, 386.
Aspergillus niger, growth and pigment formation by, 386.
Aspergillus oryzae, amylase from, activity of, 376.
Aspergillus terreus, metabolic products of, 386.
 Asymmetric induction, 250.
 syntheses, 252.
 transformation, 247.
 Atmosphere, detection and determination of gases in, 406.
 Atoms, nuclei, fission of, 8.
 Auraptene, structure of, 314.
 Auxins, growth inhibition by, 369.
 root formation induced by, 363.
Avena coleoptiles, effect of auxins on protoplasm of, 365.
bicyclo-Aza-alkanes, 191.
bicyclo[0 : 4 : 4]-Aza-1-decane, 323.
bicyclo[1 : 2 : 2]-Aza-1-heptane, 321.
bicyclo[1 : 3 : 3]-Aza-1-nonane, 322.
bicyclo[0 : 3 : 3]-Aza-1-octane, 323.
bicyclo[1 : 2 : 3]-Aza-1-octane, 322.
cis-Azobenzene, 253.
 Azobenzenes, isomeric, crystal structure of, 181.
p-Azotoluene, crystal structure of, 181.
 Bacilli, diphtheria, growth of, with pantothenic acid, 370.
 tubercle, pigment of, 278.
 Bacteria, determination of, in soils, 397.
 growth substances for, 373.
 Baicalein, 319.
 Bean pods, wound hormones from, 368, 369.
 Beckmann rearrangement, 194.
 Benzaldehyde, condensation of, with anhydrides, 211.
 Benzene, determination of, 409.
 Benzil, benzilic transformation of, 195.
 crystal structure of, 184.
 Benzobromoamides, salts, rearrangement of, 192.
 Benzoic acid, ethyl ester, ammonolysis of, in liquid ammonia, 140.
 Benzoic acids, halogeno-, field intensity at nuclear carbon in, 215.
 Benzoyl chloride, 3 : 5-dinitro-, as reagent for amino-acid and peptide detection, 393.
 3 : 4-Benzphenanthrene, crystal structure of, 179.
 Benzylmethylacetic acid, optically active derivatives, degradation of, 193.
 Benzyl phenyl ether, rearrangement of, 209.
 Beri-beri, 335.
 Beryllium, preparation of, 125.
 Beryllium carbonates, 130.
 double sulphates, 130.
 Biochemistry, animal, 335.
 plant, 362.
 Bios, constituents of, 369.
 Biotin, 370.
 Bisethylenediaminopalladous ions, substituted, 254.
 Bismuth, determination of, 418.
 Bismuth nitrate, formation of, 131.
 Bisulphites, addition of, 234.
 Blindness due to vitamin-A deficiency, 338.
 Blood, determination in, of vitamin-*B*₁, 342.
 Blood-serum, determination in, of carotenoids, 414.
 Bond lengths in conjugated systems, 177.
 Bonds, double and triple, 52.
 double, polymerisation of compounds containing, 61.
 single, 48.
 Bradycardia caused by vitamin-*B*₁ deficiency, 340.
 Bromination catalysed by oxygen, 231.
 Bromine, determination of, in air, 408.
 radioactive, separation of nuclear isomerides of, 20.
 Bromine oxides, 120.
 Brucine, detection of, 391.
 Butadiene, dimerisation of, 62.
 hydrogen bromide and chloride addition to, 230.
 polymerisation of, 64, 72.
n-Butylacetylene, hydrogen bromide addition to, 224.
*iso*Butylene, thiolacetic acid addition to, 235.
*4*²-Butylene, 2-bromo-, hydrogen bromide addition to, 224.
*iso*Butylenediaminomesostilbenediaminopalladous salts, resolution of, 255.
*iso*Butyric acid, ethyl ester, condensations of, 213.
 Byak-angelicin, 315.
 Byak-angelicol, 315.

- Cadmium, determination of, 418.
 lattice temperature of, 155.
 separation of, from zinc, 417.
- Cadmium chloride, equilibria of, with cobalt, nickel, and sodium chlorides and water, 31.
- Cesium fluorochromate, crystal structure of, 171.
 peroxide, 124.
 oxides, crystal structure of, 165.
- Calciferol, structure of, 309.
- Calcium, heated, absorbent properties of, 410.
- Calcium arsenates, equilibria of formation of, 134.
 selenate, equilibrium of, with ammonium selenate and water, 132.
 sulphate, equilibrium of, with sodium sulphate and water, 132.
 sulphate dihydrate, dehydration of, 135.
- Calines, 368.
- Callicrein, purification of, from urine, 414.
- Calycanin, 328.
- Calycanthidine, 328.
- Calycanthine, structure of, 327.
- Camphene hydrochloride, conversion of, to isobornyl chloride, 196.
- d*-Camphor- π -sulphonic acid, α -bromo-, 252.
- Cannizzaro reaction, 233.
- Carbohydrates, 258.
- Carbon, electronic structure of, 51, 52.
 filaments, velocity of vaporisation of, 151.
- Carbon tetraiodide, hydrolysis of, 236.
 monoxide, absorbents for, 411.
 detection and determination of, in air, 407.
 heat of dissociation of, 151.
 dioxide, absorption of, by dipiperidyls, 411.
 determination of, 408.
 specific heat of, 155.
 disulphide, determination of, 409.
- Carbonyl chloride, determination of, 409.
 reactions in, 143.
 compounds, condensation of, 210.
- Carica papaya* and *quercifolia*, pollen germination in, stimulated by aneurin, 367.
- Carotene, isomerisation of, 336.
- Carotenoids, determination of, 414.
- Catalysts, polymerisation, 79.
 promoting group migration, 208.
- Cations, adsorption and detection of, 415.
- Caulocaline, 368.
- Cellulose, constitution of, 189.
 disaggregation and structure of, 273.
- Cellulose, methylation of, 271.
 oxidation of, 278.
 solubility of, in hydrofluoric acid, 145.
- Cereals, anticalcifying action of, 346.
- Ceric sulphate, equilibrium of, with ammonium sulphate and water, 131.
- Cetyl sodium sulphate, penetration of films by, 111, 113.
- Chitinase, separation of, 414.
- α -Chitosamine hydrobromide and hydrochloride, crystal structure of, 184.
- Chlorination by sulphuryl chloride, 233.
- Chlorine, reaction of, with ozone, 84.
- Chlorine monoxide, decomposition of, 84.
- Chloroprene, polymerisation of, 77.
- Chromatographic analysis, 412.
- Chromium hexacarbonyl and hexachloride, crystal structure of, 166.
- Chromous chloride as absorbent for oxygen, 410.
- Chrysenes, hydroxy-, synthesis of, 303.
- Cinnamic acid, bromination of, 232.
*allo*Cinnamic acid, methyl ester, isomerisation of, 232.
- Cinnamic acids, synthesis of, Perkin, 210.
- Citrulline, colour reaction for, 352.
- Citrus nobilis*, 319.
- Claissen condensation, 213.
- Coal gas, analysis of, 412.
- Cobalt bromide, equilibrium of, with ammonium bromide and water, 132.
 carbonyl hydride, crystal structure of, 166.
 chloride, equilibria of, with cadmium and copper chlorides and water, 131.
 with lithium and sodium chlorides and water, 132.
 sulphate, equilibria of, with copper and nickel sulphates and water, 133.
- Cocaine, analysis of mixtures of, with novocaine, 392.
- Co-carboxylase, relation of, to vitamin-B₁, 339.
- Collagen, proline content of, 352.
- Copper, action of selenium oxychloride on, 143.
 detection of, in aerosols, 403.
 dietary value of, 349.
- Copper nitride, crystal structure of, 166.
 preparation of, 120.
 phosphides, 121.

- Crotonic acid, hydrogen bromide addition to, 224.
 Crystals, isotope effects in, 157.
 lattice energy of, 151.
 melting and rotation of, 163.
 molecular rotation in, 158.
 molecular, thermal transformations in, 159.
 physics of, 150.
 X-ray reflexion from, 155.
 rotation transformations in, thermodynamics of, 162.
 thermal energy in, 157.
 thermal expansion of, 156.
 vibrational energy in, 153.
 Crystallo-chemical analysis, 398.
 Crystallography, 148.
 classification in, 398.
 Cuprene, 68.
 Curtius rearrangement, 192.
 Cyanogen iodide, crystal structure of, 165.
 Cyclisation with a double bond and an aromatic nucleus, 288.
 with double bonds in different molecules, 291.
 with two double bonds, 287.
 Cytisine, structure of, 328.

 Deafness due to vitamin-A deficiency, 337.
 Deapogossypol hexamethyl ether, 285.
 Deapogossypolone, 285.
 Debye-Waller formula, 155.
 Dehydro- α -noroestrone methyl ether, 292.
 Dehydrotetrahydrosumatrol, synthesis of, 317.
 Dermatitis, chick, anti-factor for, 344.
Derris elliptica, 317.
 Deuterium oxide (*heavy water*), effect of, on amylases, 376, 377.
 Deutero-compounds, optical activity of, 237.
 Deuterons, electric quadripole moment of, 30.
 Diacetone galactose, 258.
 1:2-Diacetylene, use of, in diene syntheses, 294.
d-Diacetylmattucinol, 253.
 Diazoaminobenzene, conversion of, into *p*-aminoazobenzene, 203.
 Diazoamino-compounds, conversion of, into aminoazo-compounds, 203.
 Diazocyanides, isomeric, 254.
 Dibenzhydroxamic acids, salts, rearrangement of, 192.
 Dideuteroacetylene, polymerisation of, 71.

 Diels-Alder reaction, 64.
 Diene synthesis, 291.
 Diet, factors in, 349.
 Dietetics, 350.
trans-Diethylstilboestrol, 308.
 Dihydroconiferyl alcohol, 313.
 4:7-Diketo-7- β -naphthylheptioic acid, preparation and cyclisation of, 297.
 Diketones, cyclo-dehydration of, 294.
 Dimerisation, 62.
 Dimethyl 3:4-anhydro- β -methyl-altroside, 266.
 Dimethyl 2:3-anhydro- β -methyl-mannopyranoside, hydrolysis of, 270.
 Dimethyl 2:3-anhydro- β -methyl-mannoside, 266.
 Dimethylanimines, *o*-substituted, addition of methyl iodide to, 216.
 2:3-Dimethylbutadiene, reactions of, with 1:2-naphthaquinones, 294.
 1:9-Dimethyldecalol, 288.
 6:8-Dimethylergoline, 334.
cis- and *trans*-1:2-Dimethylcyclohexane-1:2-diols, pinacolic rearrangement of, 195.
cis- and *trans*-1:2-Dimethylcyclopentane-1:2-diols, action of sulphuric acid on, 196.
o-(β -Dimethyl- α -isopropylvinyl)-phenyltrimethylammonium iodide, 256.
 Dimethylsulphone, crystal structure of, 180.
*endo*Dicyclopentadiene, 65.
 Diphenic acid, 4:4'-dinitro-, esters, rotation of, 250.
 Diphenyls, tri-*o*-substituted, racemisation of, 257.
 Diphenyl ethers, *o*-amino-, rearrangements of, 200.
 sulphide decamethylene ether, 4:4'-dihydroxy-, crystal structure of, 184.
 Diphenylamine, crystal structure of, 181.
ay-Diphenyl-*ay*-di-1-naphthylallyl alcohol, catalytic dehydration of, 239.
 Dipoles, relation of, to chromatographic adsorption, 413.
 Diseases, deficiency, 335.
 Dissociation constants and temperature, 45.
 5:6-Ditosyl acetone glucofuranose, hydrolysis of, 262.
 Drugs, identification of, 390.
 Dunnione, structure of, 280.
*allo*Dunnione, 281.
 Durene derivatives, dipole moments of, 218.

- Dust collectors, 404.
 Dusts, analysis of, 399.
 siliceous, analysis of, 404.
 Dysprosium, detection and determination of, 393.
- Earths, rare, compounds of, structure of, 127.
 separation of, 126.
- Echinochrome A, structure of, 281.
- Egonol, structure of, 313.
- Eicosyl alcohol, films, force-area curves for, 98.
- Elements, heavy, in stars, 23.
 "transuranic," 11.
- l*-Elliptone, structure of, 317.
- Energy and entropy of solutions, 42.
 of cavity formation in solutions, 34.
- Entropy and energy of solutions, 42.
- Enzymes, flavoprotein, 354.
 pure, properties of, 353.
 riboflavin in, 343.
- Equation, Arrhenius, 83.
- Equilenin, synthesis of, 307.
- Equilibria, heterogeneous, 130.
- Equol, structure of, 313.
- Erdin, 386.
- Ergocristine, 332.
- Ergocristinine, 332.
- Ergoline, 333.
- Ergosine, hydrolysis of, 332.
- Ergosinine, hydrolysis of, 332.
- Ergot alkaloids, 331.
- Erythroglaucin, 386.
- Eserine, structure of, 326.
- Ethane, spectrum of, ultra-violet, 58.
- Ethane, dichlorotetrafluoro-, 117.
 hexafluoro-, 116.
- Ethers, detection of, 394.
 rearrangements of, group migration in, 207.
- Ethyl alcohol, reaction of, with acetic anhydride, 84.
- Ethylene, determination of, in gases from ripening fruit, 408.
 dimerisation of, 62.
 polymerisation of, 64, 71.
 spectrum of, ultra-violet, 58.
- Ethylene, tetrafluoro-, 116.
- Ethylene- $\alpha\beta$ -bis(phenyl-*n*-butylarsine), resolution of, 246.
- Ethylene glycol, reaction of, with lead tetra-acetate, 92.
- Ethyleneimines, substituted, preparation of, 244.
- Ethylene diiodide, decomposition of, 84.
- Euparin, structure of, 312.
- Europium salts, 125.
- Felspar, determination in, of quartz, 395.
- Ferricyanides, crystal structure of, 169.
- Films, adsorption on, 115.
 built-up, 103.
 mixed, properties of, 114.
 physical properties of, 94.
 tables of, 101.
 skeleton, 107.
 stereochemistry in, 111.
- Filtrate factor, 344.
- Flavone, 5 : 6-dihydroxy-, synthesis of, 319.
- Flavones, demethylation of, 318.
- Flavoprotein enzymes, 354.
- Fluorescence microscopy, 392.
- Fluorination, 117.
- Fluorine, electronic structure of, 50.
- Foods, hydroxybenzoic acids as preservatives for, 391.
- Formaldehyde, electron structure and spectrum of, 57.
- Formic acid, electronic structure and spectrum of, 57.
- Frog-spawn, galactose in, 356.
- Funiculosin, 385.
- Furans, reduction of, 310.
- Furans, amino- and hydroxy-, 311.
- Furfurylideneacetophenone, hydrolysis of, 297.
- Furyl-2-carbimide, 311.
- Fustin, structure of, 319.
- Galactogen, 355.
- Galactose in animals, 354.
- Gallium fluoride, and its complexes, 127.
 nitride, crystal structure of, 166.
 salts, 128.
- Gas analysis, 405.
 by thermal conductivity, 412.
 microchemical, 405.
 spectroscopic, 411.
- Gases, detection and determination of, in atmosphere, 407.
- Geodin, 386.
- Germanium imide, 139.
 nitride, crystal structure of, 166.
- Gladiolus corms, root formation on, 364.
- Glass, with altered refractive index, 108.
- D*-Gluco-*D*-guloheptolactone, 2-[*D*-gluco-*D*-gulohepto]hexahydroxyhexylbenziminazole from, 251.
- Glucosamine, configuration of, 269.
- Glucose ethers, 264.
 6-halogenohydrins, 267.
- Glucose, 3-amino-, derivatives of, 271.
 d-Glucose, derivatives, conversion of, into *d*-idose derivatives, 265.

- Glucosyl fluoride, 146.
 Glutamic acid, in protein hydrolyses, 352.
 tumour, configuration of, 350.
 Glycine, crystal structure of, 179.
 Glycogen, enzymic hydrolysis of, in liver and yeast, 361.
 hosphorolysis of, 359.
 torage of, in liver after galactose ingestion, 355.
 Glycol-lignin, 381.
 Gossic acid, 285.
 Gossypol, structure of, 284.
 Gossypolone tetramethyl ether, 285.
 Grignard reaction in hydrogen sulphide, 146.
 Griseofulvin, 385.
 Growth substances, plant, 362.
- Hæmocuprein, cure of anæmia with, 350.
 Hæmoglobin, muscle, 357.
 Halogens, migration of, in nucleus, 210.
 Heat of solution, from intermolecular forces, 34.
 ionic, 37.
 Helium, isotope, ^3He , 24.
 Helium-II, thermal expansion of, 156.
Helix pomatia, galactose metabolism in, 355.
 Hemicelluloses, analysis of, 380.
 Heteroauxin, root formation induced by, 363.
 Heterocyclic compounds, 310.
 Hexamethylbenzene, crystal structure of, 175.
*cyclo*Hexane, chlorination of, 233.
 sulphonation of, 234.
*cyclo*Hexane, 1 : 2 : 4 : 5-tetrabromo-, crystal structure of, 184.
 Hexanols, detection of, 393.
 Hexatriene, use of, in diene syntheses, 294.
 Hexose diphosphate, fission of, by zymohexase, 359.
*cyclo*Hexylideneacetaldehyde, condensation of, with *cyclo*hexanones, 309.
 Hofmann rearrangement, 192, 251.
 Hofmann-Martius rearrangement, 204.
 Hormones, plant, wound, 368.
 Hydratropamide, Hofmann degradation of, 193.
 (+)-Hydratropamide, Hofmann rearrangement of, 251.
 Hydrazine, solvent properties of, 146.
 Hydrindanones from hydronaphthalene derivatives, 308.
 Hydrocarbons, chlorinated, detection of, 409.
 mixed, analysis of, 410.
- Hydrocarbon compounds, long-chain, phase diagram for, 97.
 Hydrogen, absorbent for, 409.
 ortho- and para-, thermodynamics of, 158.
 para-ortho transition of, 88.
 single bond in, 48.
 Hydrogen bromide, addition of, 219, 220, 221, 225.
 • thermal transformation of, 160.
 chloride, thermal transformation of, 160.
 cyanide, determination of, 409.
 fluoride, crystal structure of, 165.
 liquid, as reagent for cyclic ketone syntheses, 303.
 reactions in, 144.
 iodide, photo-ionisation and spectrum of, 54.
 perselenide, 122.
 sulphide, determination of, 409.
 in air, 407.
 liquid, solvent action of, 146.
 Hydroxy-acids, polymerisation of, 61.
 Hydroxy-sulphones, rearrangements of, 197.
 Hypochlorous acid, addition of, 236.
 Hypovitaminosis-A, dark-adaptation test for, 338.
- Imino-ethers, rearrangements of, 199.
 Iminopersulphuric acid, 124.
*iso*Imperatorin, synthesis of, 315.
 Indigotin suspensions for determination of bacteria in soils, 397.
 Indium nitride, crystal structure of, 166.
 Indium nucleus, isomerism of, 19.
 Indole alkaloids, 326.
 Indolylacetic acid, root formation induced by, 363.
 Indolylbutyric acid, rooting of cuttings due to, 364.
*meso*Inositol in bios, 369.
 Insulin, crystal structure of, 184.
 Intermolecular forces in solutions, 33.
 Invar alloys, thermal expansion of, 156.
 Iodides, preparation of, 118.
 Iodine, as fission product of uranium, 12.
 determination of, in air, 408.
 Iodine pentafluoride, crystal structure of, 166.
 Ions, heats of hydration and solution of, 37.
 reagents for, 390.
 Iron, detection of, in dusts, 403.
 determination of, in dusts, 400.
 dietary value of, 349.

- Iron carbonyl hydride, crystal structure of, 166.
 enneacarbonyl, crystal structure of, 167.
 pentacarbonyl, crystal structure of, 166.
 Isomerisation, *cis-trans*-, 232.
 Isomerism, *cis-trans*-, 253.
 nuclear, 19.
 Isoprene, dimerisation of, 62.
 Isotopes, gaseous, separation of, 412.
 Itaconic acid from *Aspergillus*, 386.
- Juglone, 278.
- Karangin, structure of, 316.
 Kellin, structure of, 315.
 Kellinone, 316.
 Keten, dimerisation of, 84.
 Keto-chrysenes, synthesis of, 303.
 1-Keto-7-methoxy-2-methyl-1 : 2 : 3 : 4-tetrahydrophenanthrene, 301.
 2-Keto-10-methyl- $\Delta^{1:9}$ -octalin, 295.
 Ketones, cyclic, formation of, from monocarboxylic acids, 300.
 from dicarboxylic acid, 305.
 detection of, 394.
 electronic structure of, 56.
 3-Ketoquinuclidine, condensation of, with quinoline-4-aldehyde, 324.
 5-Ketoruban, 324.
 Kinetics, chemical, 61.
 Knoevenagel condensation, 211.
- Lactose, origin of, in animals, 355.
 Lævoglucosan, 258.
 Lanthanum, preparation of, 125.
 Lapachol, structure of, 278.
 Lawsone, 278.
Lawsonia alba, 278.
 Lead, detection of, 390, 403.
 in presence of mercury and silver, 390.
 determination of, 419.
 in dusts, 400.
 Lead imide, amphoteric action of, 139.
 iodide, potassium acetate solutions of, as reagent for alkaloids and drugs, 390.
 Leucine, labelled, isolation of, from protein hydrolysates, 352.
 Lignin, 380.
 distillation of, 383.
 preparation of, 381.
 structure of, 382.
 Liquids, molecular forces in, 33.
 of known refractive index for microscopy, 391.
- Liquids, organic, refractive index of, 392.
 Liquid state, 99.
 Lithium chloride, equilibrium of, with cobalt chloride and water, 132.
 chloride dihydrate, dehydration of, 135.
 peroxide, 124.
 sulphate, equilibrium of, with aluminium sulphate and water, 132.
 Lithopone, photomicrography of, ultra-violet, 395.
Lithospermin erythrorhizon, 282.
 Liver, glycogen hydrolysis in, 361.
 Lomatiol, structure of, 280.
*iso*Lomatiol, 280.
 Lossen rearrangement, 192.
 Lungs, detection in, of quartz, 404.
 mineral dust in, 403.
 β -Lupinan, 330.
 Lupinan alkaloids, 328.
dl-Lupinine, resolution of, 329.
Lupinus sericeus, 329.
 Lycopodium powder as reference substance in powder analysis, 397.
*dl-iso*Lysergic acid, 332.
 Lysergic acids, 332.
- Magnesium, lattice temperature of, 155.
 Magnesium oxide, lattice temperature of, 155.
 sulphate, equilibria of, with magnesium chloride, nickel sulphate, zinc sulphate, and water, 133.
 hydrates, 135.
 Maleic acid, methyl ester, isomerisation of, 232.
 Malonic acid, ethyl ester, ammonolysis of, in liquid ammonia, 140.
 Manganese, preparation of, 125.
 Manganese sulphate, hydrates, 135.
 α - and β -Matridines, 330.
 Matrine, 329.
 Matrimic acid, 330.
 Melting point, determination of, with microscopic heating block, 393.
 Melting points, two- and three-dimensional, 100.
 Mercury, detection of, in presence of lead and silver, 390.
 vapour, detection of, in air, 408.
 Mesitylene derivatives, dipole moments of, 218.
 Mesitylmagnesium bromide, condensations with, 213.
 Mesomorphous state, 100.
 Mesons, 30.

- Metals, action of selenium oxy-chloride on, 143.
solubility of, in ammonium salts, 137.
solutions of, in liquid ammonia, 138.
- Methacrylic acid, methyl ester, polymerisation of, 73, 80.
- Methane, crystals, specific heat of, 158.
mixed crystals of, with krypton, 161.
spectrum of, ultra-violet, 58.
- γ -6-Methoxy-3 : 4-dihydronaphthalene-1-buteryl chloride, 304.
- 2'-Methoxydiphenyl-6-carboxylic acid, 2-nitro-, 257.
- 6-Methoxy-1-ethinyltetralin, 1-hydroxy-, 291.
- 4-Methoxy-1-methyl- Δ^1 -cyclohexene-2- γ -butyric acid, 304.
- 4-Methyl acetone fructose, 264.
- 3-Methyl acetone sorbose, 264.
- Methylacetylene, hydrogen bromide addition to, 224.
polymerisation of, 71.
- 9-Methyldecalin, 287.
- 16-Methyldodecahydrochrysenes, 297.
- 3-(2'-Methylenecyclohexylidene-1'-)propene, 310.
- Methylene radical, electronic structure of, 50.
- endo*Methylenetetrahydrobenzaldehyde, 65.
- 6-Methylergoline, 333.
- Methylglucosaminide, structure of, 270.
- Methyl group, bond length in, 175.
- o*-Methyl groups, reduction of mesomerism by, 218.
- 4-Methylcyclohexanol, asymmetric dehydration of, 252.
- α -Methylhexoside chlorohydrins, 267.
- 8-Methylhydrindan-1-one, 305.
- 11-Methyloctahydrophenanthrene, 289.
- 9-Methyloctalin, 287.
- 2-Methylcyclopentene-3 : 4-dione, 291.
- 5-Methyl-1 : 2-cyclopentenonaphthalene, 290.
- β -(4-Methylthiazole-5)-propionic acid, α -amino-, as vitamin- B_1 precursor, 342.
- Methyl thiosulphite, hydrolysis of, 122.
- 1-Methyl-2-vinylcyclohexene, 293.
- 2-Methyl-1-vinylcyclohexene, 293.
- Micro-manipulators, 394.
- Microscope, polarising, 392.
- Microscope heating block, 393.
- Microscopy, 388.
fluorescence, 392.
- Microspectrograph, grating, 392.
- Migration from side-chain to nucleus, 202.
- Milk, determination in, of carotenoids, 414.
human, antirachitic potency of, 346.
- Molecules, polyatomic, electronic spectra of, 47.
electronic structure of, 48.
long-chain, formation of, 67.
overturning of, 108.
- Molybdenum, preparation of, 125.
- Molybdenum hexacarbonyl, crystal structure of, 166.
pentachloride, crystal structure of, 166.
- Monolayers, electron-ray structure of, 107.
molecular interactions in, 110.
penetration of, 112.
physical properties of, 94.
thickness of, 105.
- Morphine, detection of, 391.
- Moulds, growth substances for, 373.
metabolic products of, 385.
- Mucor ramannianus*, growth stimulation of, 372.
- Multilayers, 103.
electrical properties of, 109.
electron-ray structure of, 107.
X-ray structure of, 106.
skeleton, 107.
thickness of, 105.
- Muscle, aerobic metabolism of, 357.
anaerobic glycolysis in, 358.
- Myogen, crystallisation of, 353.
- Myristic acid, films, force-area curves for, 98.
- Naphthaquinone pigments, 278.
- Naphthyl ethers, detection of, by means of picrates, 393.
- Naphthylacetic acid, root formation induced by, 364.
- d*-6- α -Naphthylbenzamide, 3 : 5-dinitro-, Hofmann degradation of, 193.
- Nematospora gossypii*, growth substances for, 373.
- Neodymium, preparation of, 125.
- Neodymium bromate enneahydrate, crystal structure of, 171.
- Neutrons, emission of, in nuclear fission, 14.
- Nickel, thermal expansion of, 156.
- Nickel chloride, equilibrium of, with cadmium chloride and water, 131.
sulphate, equilibria of, with cobalt, copper, and magnesium sulphates and water, 133.

- Nicotinic acid, 343.
 Niobium iodides, 119.
 Nitrides, crystal structure of, 165.
 preparation of, 120.
*poly*Nitro-compounds, detection of, 393.
 Nitrogen, electronic structure of, 51.
 Nitrogen compounds, containing three-membered ring, 243.
 ring, 320.
 tervalent, resolution of, 187.
 stereochemistry of, 239.
 oxides, absorption of, 411.
 determination of, 409.
 Nobiletin, structure of, 319.
 α -Norequilenin, 298.
 Norequilenin methyl ether, synthesis of, 302.
 Norlupinan, 191.
 Norlupinan A and B, 323.
 α -Norosterone, 298, 306.
 Novocaine, analysis of mixtures of, with cocaine, 392.
 Nuclear forces, theory of, 24.
 Nutrition and vitamins, 335.
 level of, 342.
 Nyctalopia, 338.
- $\Delta^3:3'$ -Octahydrodiphenyl from butadiene, 64.
 Octahydropyridocoline, isomerism of, 240.
 Octahydrorottlerone, 318.
 $\Delta^9:10$ -Octalin, 287.
 Octalupine, 329.
 Oetric acid methyl ether, 306.
 Oestrogens, synthetic, 190, 308.
 Oestrone, synthesis of, 305.
 Olefinic linkings, addition at, 187.
 Olefins, absorption of, by sulphuric acid, 410.
 bisulphite addition to, 234.
 Oleic acid, films, force-area curves of, 97.
 Opium alkaloids, separation of, 415.
 Optical activation, 249.
 activity, transient, detection of, 248.
 Orange-peel oil, fish poison from, 314.
 Ores, analysis of, 396.
 Organic chemistry, 186.
 compounds, crystal structure of, 175.
 detection of, by m.p. and refractive index, 393.
 solubility of, in hydrofluoric acid, 145.
 Ortho-effect, 215.
 Osmium phosphide, 122.
 Osthol, 314.
 Oxalic acid, dihydrate, crystal structure of, 180.
 l-strychnine gallium salt, 128.
- REP.—VOL. XXXVI.
- Oxalyl chloride, hydrolysis of, 84.
 Oxamide, crystal structure of, 181.
 Oxidants for hydrogen bromide addition, 221.
 Oxidation in liquid sulphur dioxide, 142.
 Oxygen, absorption of, 410.
 as catalyst in hydrogen bromide addition, 228.
 electronic structure of, 50.
 Oxygen ring compounds, 310.
 Oxymatrine, 330.
 Ozone, decomposition of, 84.
 determination of, in air, 408.
 reaction of, with chlorine, 84.
- Palladous atoms, 4-covalent, valency configuration of, 254.
 Palmitic acid, and its ethyl ester, films, force-area curves for, 97.
 Pantothenic acid, 344.
 Pantothenic acid- β -alanine as growth substance, 370.
 Paraffins, high molecular-weight, structure of, 178.
 Pea-nuts. See *Arachis hypogaea*.
 Pectic acid, structure of, 379.
 Pectin, 378.
 analysis of, 380.
 Pectins, jelly formation by, 379.
 Pellagra, cure for, 343.
Penicillium chrysogenum, metabolic products of, 385.
Penicillium funiculosum, metabolic products of, 385.
Penicillium griseo-fulvum, metabolic products of, 385.
Penicillium viniferum, metabolic products of, 385.
 α -Pentadeutero-phenylbenzylamine, resolution of, 237.
*cyclo*Pentadiene, bromination of, 232.
 dimerisation of, 62, 84.
 polymerisation of, 65.
 reaction of, with acetaldehyde, 65.
 Δ^2 -Pentene, hydrogen bromide addition to, 223.
 Δ^a -Pentinen- γ -ol, resolution of, 238.
*neo*Pentyl iodide, rearrangement of, 197.
*neo*Pentylmagnesium chloride, *neo*-pentyl bromide and iodide from, 197.
 Pepsin, enzymically active constituents of, 353.
 Peptides, detection of, 393.
 Periodic acid, action of, on cellulose and starch, 277.
 Perkin condensation, 211.
 Peroxide effect, 219.
 Peroxides as catalysts in Cannizzaro reaction, 233.

- Phaseolus vulgaris*, root formation in, 363, 364.
- Phenanthrene, bromination of, 231.
- Phenol-lignin, 381.
- Phenolic ethers, catalysed rearrangements of, 209.
- dl-p*-Phenylenebisiminocamphor, re^s solution of, 252.
- Phenyl γ -ethylallyl ether, rearrangement of, 206.
- Phosphides, 121.
- Phosphoglucumutase, 359.
- Phosphonitrile, 121.
- Phosphorolysis, 361.
- Phosphorus, crystal structure of, 164. molecular structure of, 121. radioactive, as indicator in glycolysis, 361.
- Phosphorus chlorofluorides, 118.
- pentafluoride*, crystal structure of, 166.
- pentoxide*, molecular structure of, 121.
- Photomicrography in microscopic analysis, 394.
- 6-Phthalimidoglucose, 264.
- Phthoiccol, 278.
- Phyllocaline, 368.
- Physics, crystal, 150.
- Physcion, 386.
- Picrolonic acid, salts, with amino-acids, crystal habit and optical data for, 392.
- Pigments, green-leaf, separation of, from solution, 413.
- naphthaquinone, 278.
- organic, detection of, by microsublimation, 394.
- Pinacol transformation, 195.
- Piperidine derivatives, meta-bridging of, 322.
- 6-Piperidylglucose, 264.
- Piston oils, for use in pressure measurement of films, 104.
- Pisum*, aneurin as growth factor for, 367.
- Pisum sativum*, root formation in, 364.
- Plants, growth inhibitors of, 369. growth substances of, 362. promoting cell extension, 365. pectic substances of, 378. root formation induced in, by auxins, 363. sub-tropical, root formation induced in, 363. wound hormones of, 368.
- Plant viruses, 353.
- Plumbagin, 278.
- Polar groups, reactivity of, graded from monolayer penetration, 113.
- Polymers, active, lifetime of, 75.
- Polymerisation, gas-phase, 68. kinetics of, 61. liquid-phase, 77.
- Polyporus adustus*, growth of, with aneurin, 373.
- Polystyrene, ultracentrifugal separation of, 81.
- Polythionic acids, formation of, 122.
- Polyuronides, analysis of, 380.
- Pongamia glabra*, 316.
- Potassium, vibrational energy of, 154.
- Potassium ammono-magnesiate, -plumbite, and -sodiate, 139. ammonostannite, 139.
- 2 : 2'-dipyridyl and 4 : 5(o)-phenanthroline aurous cyanides, crystal structure of, 174.
- fluorochromate, crystal structure of, 171.
- heptafluoniobate, crystal structure of, 170.
- heptafluotantalate, crystal structure of, 170.
- iodide, reaction of, with antimony pentachloride in liquid sulphur dioxide, 142.
- nitrate, equilibrium of, with nitric acid and water, 134.
- peroxide, decomposition of, 124.
- salts, equilibria in systems of, with water, 133.
- Potential, surface, 101.
- Powders, analysis of, 397.
- Praseodymium, preparation of, 125.
- Precipitation apparatus, electrostatic, 401. thermal, 402. of dusts, 401.
- Primetin, structure of, 319.
- Primula modesta*, 319.
- Proline as plant growth substance, 368.
- cyclo*Propane, bromination of, 231.
- Propionic acid, detection of, 392.
- Propylene, hydrogen bromide addition to, 220.
- Propylene, 1- and 2-bromo-, hydrogen bromide addition to, 223.
- Proteins, films, viscosity of, 96. in diet, 349. structure of, and amino-acid analysis, 351.
- Protoactinium, nuclear fission of, 18.
- Pump, hand, for sampling, 408.
- Pyridine, homologues, preparation of, 320.
- Pyridoxin. See Vitamin-*B*₆.
- Pyruvic acid, disposal of, in relation to vitamin-*B*₁, 339.
- Quartz, detection of, in lungs, 404. determination of, in felspar, 395.

- Quinine derivatives, preparation of, 324.
- Quinoline, 2-amino-, preparation of, 320.
- iso*Quinoline alkaloids, 330.
- Quinolinic acid as cure for pellagra, 343.
- Radioactivity, 7.
natural, 23.
- X-Rays, cameras for, 156.
diffraction of, use of, in analysis of dusts, 404.
reflection of, by crystals, 155.
- Reactions, bimolecular, rôle of solvents in, 83.
theories of, 86.
chain, nuclear fission in, 15.
in non-aqueous solutions, 135.
mechanism of, 191.

- Tar, determination of, in dusts, 400.
- Tellurium, as fission product of uranium, 12.
isotopes, isomeric, 21.
- Tetradeuterethylene, spectrum of, 59.
- Tetrahydroeuparin, synthesis of, 312.
- Tetrahydrofurans, hydroxy-, 311.
- Tetrahydropyran-4-carboxylic acid, preparation of *bicyclo*-compounds from, 321.
- α -Tetralone, condensation of, with acetylcyclohexene, 295.
- Tetramethylammonium dichloroiodide, crystal structure of, 165.
- Tetramethylethylene bromohydrin, pinacolone from, 196.
- Thermal expansion of crystals, 156.
- Thermodynamics and structure of crystals, 150.
of solutions, 40.
- Thiamin. See Vitamin-*B*₁.
- Thiohydrolysis, 146.
- Thionyl acetate and thiocyanate, 141.
- Thiosulphates, decomposition of, 123.
- Thiosulphurous acid, 122.
- Thorium, fission products of, 14.
neutron emission by, 18.
phosphide, 121.
phosphides, crystal structure of, 166.
- Titanium iodides, 119.
nitride, crystal structure of, 166.
- α - and β -Tocopherols, structure of, 347.
- Toddalolactone, structure of, 315.
- Toluene, bromination of, 231.
chlorination of, 233.
- o*-Toluidine-3:5-disulphonic acid, resolution of, 252.
- 3-Tosyl diacetone glucose, removal of tosyl from, 260.
- Tosyl groups, removal of, 260.
- 3-Tosyl methyl glucopyranoside, hydrolysis of, 261.
- 2-Tosyl β -methylglucoside, hydrolysis of, 260, 265.
- Transformations of different order, thermodynamics of, 96.
- Traumatins, 368.
- Triacetyl acetone fructose, 264.
- Triacetyl glucose 1:2-anhydride, 258.
- Triacetyl 4-mesyl β -methylgalactopyranoside, action of sodium methoxide on, 260.
- Triacetyl 4-mesyl β -methylglucopyranoside, action of sodium methoxide on, 260.
- n*-Triaccontane, crystal structure of, 178.

- Tricaproin, films, force-area curves of, 97.
 Triethylamine, solution of, in liquid sulphur dioxide, 141.
 Trimethylamine oxide, crystal structure of, 180.
 Trimethylethylene, hydrogen bromide addition to, 221, 224.
 Trimethylhazeinic acid, 319.
 2:4:6-Trimethyl β -methyl-*d*-idopyranoside from 2:3-anhydro-methylmannoside, 265.
 Trioxymethylene, catalytic decomposition of, 84.
 Triple point, 99.
 2:4:6-Triisopropylphenyl *iso*-propyl ether, treatment of, with phenol and boron fluoride, 208.
Triticum vulgare, seeds, growth substances in, 373.
l-Tudarinine, 331.
 Tumours, glutamic acid in, configuration of, 350.
 Tungsten hexacarbonyl, crystal structure of, 166.
 4⁹-Undecenoic acid, hydrogen bromide addition to, 223.
 4¹⁰-Undecenoic acid, hydrogen bromide addition to, 220, 229.
 4⁹-Undecenol, hydrogen bromide addition to, 223.
 4⁹-Undecynoic acid, hydration of, 225.
 4¹⁰-Undecynoic acid, hydrogen bromide addition to, 224.
 Uranium, disintegration of, 8.
 fission products of, 14.
 isotopes, 11.
 separation of, 16.
 neutron emission by, 18.
 Urine, human, callicrein from, 414.
 Valine, dietary value of, 349.
 Valves, thermionic, determination of alkaline-earth metals in coatings of filaments of, 405.
 Vanadium iodides, 119.
 oxychloride, action of liquid hydrogen sulphide on, 146.
 Vanthoffite, 130.
 Velocity of reaction, solvent rôle in, 82.
 Vibrational energy, Debye expression for, 154.
 Vinyl bromide, hydrogen bromide addition to, 220.
 compounds, polymerisation of, 67.
 Vinylacetylene, hydrogen bromide and chloride addition to, 231.
 α -Vinyleinnamic acid from benzaldehyde and crotonic anhydride, 211.
 1-Vinylcyclohexene, 293.
 3-Vinylcyclohexene from butadiene, 64.
 Viscosity, surface, measurement of, 94.
 Vitamins, and nutrition, 335.
 antirachitic, 309.
 Vitamin-A, deficiency of, effects of, 337.
 determination of, 336.
 methyl ester, synthesis of, 337.
 Vitamin-A₂, 337.
 Vitamin-B₁, 339.
 assay of, 341.
 deficiency of, bradycardia in, 340.
 detection of partial deficiency of, 342.
 Vitamin-B₂ complex, 343.
 Vitamin-B₆, 325, 343.
 as yeast growth substance, 372.
 See also Adermin.
 Vitamin-C, 345.
 Vitamin-D, 346.
 Vitamin-D₂, isomers of, 346.
 structure of, 309.
 Vitamin-E, 347.
 Vitamin-K, 347.
 Vitamin-K₁, constitution of, 282.
 synthesis of oil resembling, 283.
 Wagner-Meerwein rearrangement, 196.
 Water, spectrum of, electronic, 55.
 Wettability and deposition of films, 104.
 Wheat starch, 374.
 Xerosis, 335.
m-Xylene, chlorination of, 233.
m-2-Xylidine, acetyl derivative, nitration of, 218.
 Yeast, glycogen hydrolysis in, 361.
 growth substances of, 369.
 Yohimbine, detection of, 390.
Zea mays, root formation in, 364.
 seeds, growth substances in, 373.
 Zinc, detection of, 390.
 lattice temperature of, 155.
 separation of, from cadmium, cobalt, or nickel, 417.
 Zinc amide, amphoteric action of, 138.
 nitride, 120.
 sulphate, equilibria of, with magnesium sulphate, sulphuric acid, and water, 133.
 Zymohexase, action of, on hexose diphosphate, 359.
